

The sky's the limit

IAS Academy provides a range of enlightening courses for clinicians to brush up their skills and enhance how they deliver care to patients.

Some of the courses include:

- The Ortho-Restorative course looks at delivering a complete solution to patients, through the combination of existing orthodontic experience with restorative and aesthetic dentistry
- The Anterior and Posterior Composite course covers how to successfully diagnose, plan and effectively restore posterior and anterior composite, led by Dr Shiraz Khan
- The Complete GDP course with Dr Ian Buckle helps clinicians to examine, diagnose, plan for and treat every patient
- The Lingual Braces course with Dr Asif Chatoos uses tried and tested techniques to improve assessment and diagnosis, provide patient treatment options and give predictable case results.

There's plenty more courses to browse through on the IAS Academy website – why not get in touch to find out more?

For more information on upcoming IAS Academy training courses, visit www.iasortho.com or call 01932 336470 (Press 1).

Two's company

The Straumann BLX implant system facilitates achievable, predictable and minimally-invasive immediate protocols in all bone types. With premium Swiss quality, clinicians can work with precision and confidence.

The high-performance Roxolid material helps reduce invasiveness with smaller implants, preserves vital structures and increases treatment options in tricky anatomical situations. The clinically proven SLActive surface reduces the healing period and enhances bone regeneration, even at compromised sites.

The Straumann TLX provides the stability of the Straumann BLX implant, with the enhanced aesthetics of a tissue level connection. With a built-in emergence

profile and simple soft tissue management, the Straumann TLX implant offers simplicity and efficiency in every case.

Both of these advanced implant systems use one common drill set and TorcFit connection, for maximum compatibility with minimum investment.

For more information, visit www.straumann-uk.co/tlx or www.straumann.com/en/dental-professionals.html.

Sensitive patients? Look no further

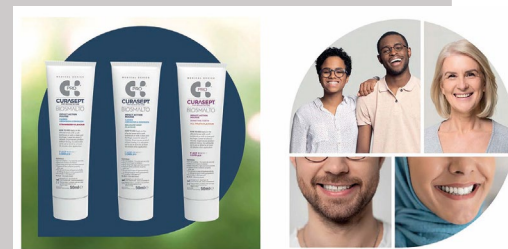

As a clinician you could see many patients suffering with sensitive teeth on a regular basis. There are a few ways you can support your patients in managing this issue – one is to ensure the products they're using are suited to their needs!

Curasept Biosmalto from J&S Davis re-mineralises and strengthens the enamel using an innovative formula that contains strontium salts to reduce sensitivity. This formula has seven years of research behind it so you can rest assured that your patients will be using a product they can trust to be effective.

What's more, the Curasept Biosmalto Sensitive Teeth Line from J&S Davis is also

vegan which means you can recommend this product to pretty much all of your patients. What more could you need?

For more information on the industry-leading products available from J&S Davis, visit www.js-davis.co.uk, call 01438 747 344 or email jsdsales@js-davis.co.uk.

A winning combination

Learning new skills is well-established to improve self-esteem and uplift mood. When you couple that with skills that open up new opportunities, you know you are on to a winning combination. Ucer Education provides exceptional postgraduate education in implantology within the UK. Directed by Specialist Oral Surgeon, Professor Cemal Ucer, Ucer Education has seen thousands of satisfied dentists become experienced with all aspects of implantology over its prestigious 25 years.

Ucer Education's flagship is the Postgraduate Certificate (PGCert) in Implant Dentistry (EduQual Level 7). Across the year, you will receive a top-tier grounding in all the diverse skills and knowledge that go into implant provision. From treatment planning and leveraging the latest equipment and software, to hard-won surgical skills and advice, to post-operative care and patient management. Much of this information and the skills developed

are transferable, making it an excellent investment of your time regardless of how far you take your studies.

The next course begins soon, so for more information visit www.ucer.education, call Prof Ucer on 07767 645331 or email ucer@oral-implants.com.
