Perfect power in a click!

The innovative Piezomed unit from W&H ensures that you have the exact power you need for ultrasonic bone surgery, offering extremely high cutting performance whilst also being gentle on soft tissue.

Utilising state-of-the-art ultrasound technology, the unit produces high-frequency microvibrations that allow incredible precision during bone surgery, implantology, endodontic and periodontic procedures. This aids the preservation of soft tissue at the site, leading to less painful treatment and quicker healing.

Additionally, the unit automatically detects the attached instrument and applies the correct power, ensuring maximum control during treatment and allowing the provision of an exceptional standard of care.

To find out more, visit www.wh.com/en_uk, call 01727 874990 or email office.uk@wh.com.

Advance your skillset

In dentistry, there's always room to improve your current expertise to provide better outcomes for your patients.

The Soft Tissue Around Dental Implants course with BPI Dental Education & Training enables you to diagnose potential soft tissue problems before treatment which can lessen challenges you might come across post-surgery. You'll be shown some of the best plastic periodontal surgery techniques used to improve and maintain aesthetics and longevity. Ultimately, this course will lead you to achieving better results for your patients.

This two-day hands-on course is led by Dr Boota Singh Ubhi who specialises in periodontology and is highly experienced in implant surgery. As well as this, Dr Ubhi is devoted to delivering top quality postgraduate education – as the lecturer on this course you have the opportunity to work closely with an expert who can share tips and advice with you throughout.

For more details or to book your place on the next course with Dr Boota Singh Ubhi, visit <https://bpieducation.co.uk/dental-courses/surgical-crown-lengthening/>.

Putting dentists first

Here at Colosseum Dental UK, we want to show our appreciation to our dentists for the exceptional care they deliver to every patient.

We've made some impressive changes to our clinical facilities – we've modernised our surgeries, providing our dentists with advanced equipment, introducing more intraoral scanners and even some CBCT technologies. We understand that working with the latest innovations in dentistry can aid in offering patients the best possible care.

Plus, if you'd like to branch out into a new specialism, we provide unmatched

career development opportunities. From clinical governance and support, to excellent mentoring opportunities, we truly want to see you succeed, and will help you take the steps to where you need to be. At Colosseum, you have a voice and we actively seek your views and feedback, you're not just a number. You'll have support from our experienced management team and wherever you are in your career, we'll help you reach your potential.
