Take your career from limited to limitless

How you view your situation or your life, is how it will be. If you see barriers you will struggle, if you see opportunity you will succeed.

To take your dental career to new heights, you have to be ready and willing to find new ways of working, to seek out the chance to grow and to be committed to your development. There are many ways to push yourself outside your comfort zone, from learning new clinical skills to buying your own business, building confidence in selling to patients or public speaking.

The Re-IGNITE Academy, led by Dr Mahmood Mawjee, is here to help you take those life-changing first steps. Its programmes will teach you how to strategise your growth, prepare for it and make the very most of it. It will give you the skills and confidence you need to go out into the world and make your dreams happen.

Ultimately, the Re-IGNITE Academy will help you change your mindset and take your career from limited to limitless. Who wouldn't want that?

Look up The Re-IGNITE Academy on *Instagram* or online to find out more!

Offer more to your patients

If you'd like to expand the orthodontic treatments you can offer your patients the Lingual Braces course from IAS Academy could be for you.

Learn how to assess, diagnose, and fit a lingual fixed brace from ClearSmile on the one-day course. Throughout the day you will learn the principles of lingual orthodontics as well as completing an extensive hands-on session. Experts will support you during the practical afternoon and optional life-long mentoring will be available once you've completed the course too!

Overall, you'll learn to provide dentistry that lasts when you embark on the Lingual

Brace course from IAS Academy. Don't miss your chance to elevate your treatment options – book your place today!

For more information on upcoming IAS Academy training courses, visit www.iasortho.com or call 01932 336470 (Press 1).

Ergonomic perfection for total control

Belmont's new flagship treatment centre, the Eurus S6, exudes refinement with a contemporary design that has the Belmont renowned below-the-patient swing-arm delivery system and powerful intuitive touchscreen for advanced instrument control.

The clear and logical touchscreen offers one touch control across a wide range of functions including: handpiece flushing, spittoon valve cleaning, micro motor speed control, turbine speed limiting, optic on/off, scaler settings, spittoon bowl flushing, dental light operating modes and much more.

With an easy-to-read display that tells you all you need to know at a glance, you can pre-programme settings or restore to standard in just one touch. As a combination this brings a wealth of operating options to the fingertips of the dentist.

The ergonomic functionality allows maximum working space for both operator and assistant. With the spittoon rotated 90 degrees, clear access to the left side of the patient allows the operator to work with ease. Uniquely, this treatment centre allows

positioning of the doctor table, instruments, and assistant tray discreetly out of view behind the chair backrest, easing any patient anxiety as they enter the surgery.

New features include a taller backrest cushion with additional lumbar support for unrivalled patient comfort, a wireless foot control as standard for ease of operator positioning with low battery indicator on the touchscreen, plus a wealth of new safety features.
