

Products that last a lifetime

J&S Davis is proud to offer dental professionals the BPR Swiss range of portable dental equipment.

Made in Switzerland, the BPR Swiss range of systems encompasses portable dental units, chairs, trolleys, lights and stools, as well as options for the dental lab. These products are easy to assemble and dismantle, without any sacrifice to their quality. For over 25 years, BPR Swiss has always prioritised quality, performance and innovation, delivering products to busy professionals that can be depended on, time and time again.

For dental professionals seeking an economic and high-performing alternative to static equipment, visit www.js-davis.co.uk, call 01438 747 344 or email jdsales@js-davis.co.uk.

When the going gets tough...

Support is a vital factor in being able to work effectively, especially when things get challenging.

At Colosseum Dental UK, we have fantastic support structures in place to ensure that all concerns are heard and acted on. In fact, we've combined our promises into the HALO: Happy, Action, Listening and Opportunities.

When you see the HALO in our clinics, you'll know that we're always listening and making improvements. In fact, we've been recognised for our commitment to making a brilliant workplace for our people, and are now a certified Great Place to Work!

If you're looking to work somewhere where you're always supported, visit www.colosseumdental.co.uk/careers/job-opportunities/dentists. Or, for an informal chat, call our Head of Recruitment, Lee Catlin on 07936 358758.

Create a lasting impression

Enhance your impressions with Imprint 4 VPS Impression Material from 3M.

Your key to fast, stress-free impressions, the material doesn't start setting until

the end of working time, meaning you'll always have time to seat and load the tray regardless of whether you use a one step or two-step impressing technique.

This is just one of the reasons that it was named a Top Product in the 2022 Dental Advisor Awards. Judges awarded the material a 97% clinical rating and loved its quick setting time and the fact that using it resulted in less need for retakes.

Make sure every impression you take is a lasting one. Contact 3M Oral Care by calling 08705 360036 or visiting www.3m.co.uk/Dental.

New dam range launched!

New from COLTENE, the leading global manufacturer for tools and materials across a range of treatment segments, are HySolate Latex Dams. These dental dams are low protein and powder-free, reducing the risk of latex hypersensitivity.

Each item will give you strong retraction, a reliable infection control barrier and a dry operating field. Different scents, thickness, sizes and colours are available. The lighter colours provide natural illumination, or choose the flagship product in the range, HySolate Black Edition, for the ultimate clear contrast so perfect for photographs, and pre-printed so no need to mark the dam before punching – work faster, smarter!

HySolate joins other brands in the COLTENE group to upgrade your

dentistry. These include MicroMega and HyFlex for predictable, conservative endo, Affinis for naturally beautiful restorative applications, as well as equipment and materials to keep your practice clean and safe.

We simply want to help you do what you do, even better! For more on COLTENE, visit www.coltene.com, email info.uk@coltene.com or call 0800 254 5115.

A record-breaking achievement!

Dental Partners, an exciting and fast-growing network of dental practices, are in high spirits after celebrating a whopping 100,000 reviews – the first ever group to do so.

This breakthrough has been achieved in association with Working Feedback, a top tier partner with a system that integrates directly with Software of Excellence and Dentally. The system collects, moderates and shares feedback through easy-to-use software and is an approved review partner for the CQC and NHS digital, which means

the system also takes care of the Friends and Family Test (FFT) requirements.

Dental Partners' Chief Operating Officer, Caron Best, said: 'Our belief in the importance of feedback has now been proven right, not only by the numbers but also what the reviews themselves say, demonstrating their worth via increased patient enquiries and our ability to react to what our patients say about us.'

Visit www.workingfeedback.co.uk, email info@workingfeedback.co.uk or call 0800 043 2100 for further information.
