

## Brush up on your dental education

Did you know 3M Oral Care offers a free resource for busy dental professionals?

The Brain Floss blog is a platform comprised of clinical articles, case reports and webinars.

There's something for everyone, and it's regularly updated to ensure Brain Floss remains relevant to the profession.

There's also plenty of resources offered by leading professionals, from insights, hints and tips – all expertly curated to ensure it's interesting and valuable to you. Don't miss out – subscribe today to receive a fascinating array of educational solutions, all in one place for ultimate convenience.

Visit the 3M Brain Floss dental blog at <https://dentalblog.3m.com/dental/> or for more information, call 08705 360 036 or visit [www.3M.co.uk/Dental](http://www.3M.co.uk/Dental).

## Apposite composite

Looking for a versatile, durable composite? Brilliant Crios from COLTENE is a reinforced composite bloc for the fabrication of permanent, indirect restorations using a CAD/CAM grinding process.

Available in two translucencies (and two sizes) with a total of 13 shades, it offers a broad spectrum of solutions for aesthetic single-tooth restorations – including inlays, crowns and veneers – and is ideal for use in both the anterior and posterior regions.

Brilliant Crios' outstanding mechanical properties are the result of controlled, stress-free, thermal curing. Its multimodal composition of dental glass and amorphous silica in combination with a reinforcing resin matrix, make it an optimal material for permanent single-tooth restorations. Its shock-absorbing effect reduces the stress transmission and so is also well suited for implant restorations.

For more on COLTENE, visit [www.coltene.com](http://www.coltene.com), email [info.uk@coltene.com](mailto:info.uk@coltene.com) or call 0800 254 5115.

## BDIA Dental Showcase returns with a new and exclusive partnership in 2024

BDIA Dental Showcase is delighted to announce that NSK will be attending the 2024 event as the Official Handpiece Partner.

NSK will also be supporting the NEW hands-on Clinical Excellence Workshops, providing high-quality handpieces and equipment in order to facilitate an excellent learning experience during the practical sessions.

This is the first time in several years that NSK has exhibited at a major exhibition and we are delighted that they have chosen BDIA Dental Showcase 2024 for their return.

Event Director, David Hussey, commented: 'We're really excited to be

welcoming NSK back to BDIA Dental Showcase. It is testament to the strength of Showcase, that companies like NSK want to use our platform as the main event of the year to connect face-to-face with their customers. This also gives dental professionals attending a wider choice of manufacturers and suppliers to engage with during their visit, making Showcase bigger and better than ever!'

To browse the extensive exhibitor list, visit the website. Plus, don't forget to register – it's free!

BDIA Dental Showcase 2024 will take place on 22 and 23 March at ExCeL London. For further information visit [dentalshowcase.com](http://dentalshowcase.com).

## Exceptional decontamination requires excellent equipment

Eschmann provides a comprehensive portfolio of equipment, consumables and services to help you maintain exceptional decontamination processes.

These include the range of Little Sister autoclaves, offering 'B' and 'N' type cycles with varying capacities and sizes to suit different practice needs. Added features such as real-time recording and automatic data logging ensure efficient and highly accurate cycle monitoring and documentation.

Another solution in the portfolio is the Miele under bench washer disinfector, which offers heavy duty cleaning,

disinfection and drying in under an hour to support best practice cleaning of instruments. The combination of touch controls, auto-close doors and a built-in water softener streamlines workflows and prolongs product life.

All Eschmann equipment can also be supported by the all-encompassing Care & Cover programme, which provides invaluable maintenance and servicing by factory-trained, UK-based engineers. This consists of unlimited breakdown cover, Annual Validation and Pressure Vessel Certification, unlimited Eschmann parts and labour as well as Enhanced

CPD user training as standard, for complete peace of mind.

For more information on the highly effective and affordable range of infection control products from Eschmann visit [www.eschmann.co.uk](http://www.eschmann.co.uk) or call 01903 875787.
