

Replacing your autoclave? Wondering what to do with the old one?

If the time has come to replace your autoclave, Eschmann offers an array of industry-leading solutions that are designed for unparalleled

reliability, longevity and workflow efficiency. Further still, Eschmann will deliver and install your new equipment seamlessly, and even provide an option for later taking away the old model so you don't need to worry about disposing of it correctly!

Equipment options available to dental practices from Eschmann include the Little Sister range of autoclaves. The latest range features 'B' type vacuum and 'N' type non-vacuum models in a variety of capacities to suit the needs of every business. The Enbio handpiece steriliser is also the fastest 'B' type autoclave on the market, offering cycles from as little as 15 minutes.

Plus, all Eschmann autoclaves can be supported by the Care & Cover servicing package, which includes Annual Validation and Pressure Vessel Certification, annual service and software upgrades, unlimited breakdown cover, unlimited Eschmann parts and labour, Enhanced CPD user training and on-site support from 50+ Eschmann engineers nationwide.

For more information on the highly effective and affordable range of infection control products from Eschmann visit www.eschmann.co.uk or call 01903 875787.

New series of events announced!

Clover Dental Fit Out are excited to launch a new format of events across the UK, welcoming all dental professionals. The team have designed the 2024 events programme with your passions and hobbies outside of practice in mind with handpicked keynote speakers and luxury venues. From Porsche Roadshows, enjoy test driving a new model and fine dining experience to Bootcamps and a Women's Dental Retreat, Clover Dental Events are not to be missed.

The calibre of speakers at the events is exceptional, with renowned specialists delivering keynote topics, workshops, and presentations. These experts delve into

diverse topics ranging from technological innovations to emerging trends in dental care. Attendees can expect to gain invaluable knowledge and perspectives that can significantly impact their practice and patient care.

Our remarkable meetings cater to a broad audience within the dental community. Dental professionals at all career stages, including general practitioners, specialists, educators, and researchers, can benefit from the wealth of information and networking opportunities provided. Furthermore, dental students and recent graduates find these events invaluable for initiating their

professional journey, gaining insights into various career paths, and establishing connections with mentors and peers.

Clover Dental Events offer a unique amalgamation of educational enrichment and networking opportunities, making them essential for anyone seeking to stay at the forefront of dental practice, technology, and research. With a diverse array of speakers and a broad target audience, these events contribute significantly to the continuous advancement and excellence of the dental profession.

For booking and event information, visit <https://cloverdentalfitout.co.uk/dental-events/>. Alternatively contact Steve Kettle on steve@cloverdentalfitout.co.uk or 07961 669996.

Room for a view

In order to create an accurate impression, a clear working view of the tooth is crucial.

Astringent Retraction Paste from 3M Oral Care is a fast, convenient and effective solution for gingival retraction, offering an advantage over gingival retraction cords that can be difficult and time-consuming to place.

Boasting an extra-fine tip, the Astringent Retraction Paste from 3M Oral Care delivers a 15% aluminium chloride astringent paste

right into the sulcus, gently pushing the gingival tissue away from the tooth so dental professionals can efficiently capture a detailed impression of the preparation margin. It can be used for taking material-based or digital impressions for Class II and V fillings.

One cord can be replaced by Astringent Retraction Paste from 3M Oral Care, enabling temporary retraction of the marginal gingiva and providing a dry sulcus

on a healthy periodontium. It also offers long-lasting haemostasis.

For more information, call 08705 360 036 or visit www.go.3M.com/ocsdpr.
