Save time and see more patients

Intraoral scanning gives the dental professional accurate data and streamlines processes, while patients benefit from greater comfort than traditional impressions alongside enhanced education and trust.

The award-winning Virtuo Vivo Intraoral Scanner from the Straumann Group is a small and lightweight solution which is ergonomically designed for a pen-like grip. It uses an open system, allowing the clinician to easily export and share scan data with partner laboratories.

With the Virtuo Vivo hard and soft tissue are scanned from multiple orientations simultaneously, capturing difficult-to-see areas with minimal effort. It also boasts a removable, autoclavable sleeve in coated metal to ensure proper hygiene standards.

With two out of three patients saying they would consider switching to a dentist who uses more advanced technology, discover how the Virtuo Vivo Intraoral Scanner could transform your practice by visiting www.straumann.com/digital/us/en/home/equipment/io-scanners.html.

Working with your patients

To help your patients maintain excellent oral hygiene routines between appointments, it is important to find techniques, routines and products that they can work well with.

The Curaprox interdental brushes are designed for patient comfort and ease of use, featuring a flexible brush head that bends efficiently around the teeth to ensure a thorough yet gentle clean.

Better still, the products meet modern patient's expectations, with a unique click system that means only the brush head needs to be replaced – the handle can be

reused to significantly reduce the amount of plastic waste generated.

Just another reason why your patients will love Curaprox interdental brushes! To find out more, visit www.curaprox.co.uk.

Excellent image quality for all

Reliable imaging enables you to decrease the time to diagnosis and accurate treatment. Clark Dental understands the importance of this, which is why they offer a wide range of intraoral and extraoral imaging systems to meet your needs.

The Dentsply Sirona XIOS XG Supreme AE is an excellent option. With multiple

functions and features like varying cable lengths, sensor sizes, and connectivity options, the sensor can adapt to your requirements.

XIOS XG Supreme delivers fantastic image quality, as well as the ability to immediately see images on the computer.

The sensor is designed to optimise chairside diagnosis for all patients, whether you provide general or restorative dentistry, endodontics or hygiene procedures.

To find out more about the XIOS XG Supreme from Clark Dental call 01268 733 146, email info@clarkdental.co.uk or visit www.clarkdental.co.uk.
