## PRECISION IS ESSENTIAL

Every dental treatment places high demands on the dentist, team and equipment.

Microbrush premium applicators rise to the challenge: their flexible handles remain in the desired position without springing back, while non-absorbent fibres facilitate the economical use and precise placement of material. New in the range is the size 'ultrafine' with a 0.5 mm slim head.

The award-winning Microbrush applicator is your first choice for hard-to-reach areas in the mouth. Its rigid brush is designed for the application of cement, caustics, binding agents, sealants and haemostatic solution. The useful tool is available in regular, fine,

superfine, ultrafine and various colours to implement multi-stage procedures.

The TRU applicator is suitable for calcium hydroxide paste, sealant, disclosing solution, as well as binding agents and caustics. The tip can be bent twice, while the 12 cm handle ensures maximum control and optimal access to any area.

The Micro-Stix applicator simplifies the placement of veneers, crowns, brackets and inlays. The adhesive tip securely lifts these delicate objects. The applicator is removed with a slight twisting motion after positioning, leaving no residue behind.

With the UltraBrush applicator, desensitisers, whiteners, fluoride and fissure sealing are distributed evenly. Its chemical-resistant fibres withstand aggressive substances. The Microbrush X applicator is perfect for endodontic treatments. It has a superfine, extended tip for especially tight spaces and bends to 90 degrees. All products are available in hygienic dispenser boxes as well as in a handy refill pack. Contact [samples@microbrush.eu](mailto:samples@microbrush.eu) for samples.

## PROTECT AGAINST SUGARY SNACKS

Frequent consumption of sugar-rich snacks is associated with increased risk of dental caries. Help patients maintain healthy snacking habits in conjunction with effective oral hygiene by recommending the CS 5460 manual toothbrush from Curaprox.

The CS 5460 is distinct from conventional toothbrushes with its octagonal handle and compact brush head, featuring precisely 5,460 ultra-fine CUREN filaments. This creates a durable but extremely soft brushing surface that is ideal for cleaning even the most hard-to-reach areas, including the posterior region.

Available in a wide range of exciting colours, the CS 5460 can be used in combination with the CPS Prime interdental brush for optimal results.

For more information call 01480 862084, email [info@curaprox.co.uk](mailto:info@curaprox.co.uk) or visit [www.curaprox.co.uk](http://www.curaprox.co.uk).

## SLIDE YOUR PATIENTS TOWARDS BETTER ORAL HEALTH

Ergonomically designed with an easy grip handle, the Wisdom Clean Between Easy Slide Tensioning Flossers with PTFE tape make maintaining oral health simple for patients.

The innovative Waveform Tension Control System holds the tape taut to facilitate smooth movement between the teeth. Not only does this promote optimal patient comfort, but it also gives them total control for a more effective and less traumatic interdental clean.

Easy to use, even for those with poorer dexterity, the Wisdom Clean Between Easy Slide Tensioning Flossers slide easily between the teeth to make effective interdental cleaning possible for more of your patients.
