

IMAGING PRECISION FOR THE ENTIRE PRACTICE

ensure your risk of over- or under-exposure is reduced, so you can create quality images consistently.

Versatile installation makes the CS 7200 Neo Edition either the perfect chairside companion, or the hub for an entire practice's imaging system. Ethernet connections are all that is required to share a network; there isn't even the need for a dedicated PC alongside it.

Your patients will love reduced waiting times and

Diagnose with confidence with the CS 7200 Neo Edition from Carestream Dental, the imaging system that prioritises efficiency with remarkable clarity.

A compact system boasts quick scanning in as little as eight seconds with the ever-brilliant Smart Plates. Manoeuvre them as easily as film, expose, then scan to analyse, and clear them to reuse again, and again, and again. The plates are specially crafted to

easy to understand images, as well as a process optimised for safety, exposing them to a reduced radiation dose as compared to film.

To find out more about the CS 7200 Neo Edition and how it can transform your practice, contact the Carestream Dental team.

PRACTICE MANAGEMENT CPD CONFERENCES THIS NOVEMBER

A virtual Conference on **Effective Dental Practice Management** will be held on 15 November 2023, hosted by Healthcare Conferences UK and aimed at dental practice managers and dentists.

As pressures on services continue to increase, outstanding dental practice management has never been more important. Practice management is constantly evolving and can be busy and challenging. At this national conference you will hear from experts who will talk you through your legal and statutory responsibilities in relation to employment law, data protection law and forthcoming changes to the inspection framework. You will also hear from industry experts on improving your complaints procedures and the customer journey; supporting staff mental health; business development and marketing. With plenty of time to network with colleagues and to put your questions to experts, you'll leave the day feeling empowered and full of ideas to take away.

For the full programme content and to book visit www.healthcareconferencesuk.co.uk/conferences-masterclasses/dental-practice-management and use code HCUK20bdj for a 20% discount.

A virtual CPD Conference on **Preparing for Inspection of Dental Practices 2023** will be held on 8 November 2023. This event will guide you through the new framework and Quality Statements, and how they will be used for dental practices. Keynote sessions from experts in this field will cover a wide range of topics, including how the CQC will gather evidence, preparing staff, assessing patient experience and how well led your practice is, and ensuring your procedures and processes are up to date.

With plenty of time dedicated to networking with colleagues and opportunities to put your questions to experts, you'll leave the day feeling empowered in your practice management role.

For the full programme and to book visit www.healthcareconferencesuk.co.uk/conferences-masterclasses/inspection-dental-practices and use code HCUK20bdj for a 20% discount.

CHAIRSIDE VITAMIN D MEASURING

Vitamin D is primarily synthesised in the skin when exposed to UV-B sunlight and, to a lesser extent, absorbed through food. Unfortunately, factors such as increased screen time, indoor activities, sun protection measures during summer, and the low position of the sun in winter have contributed to vitamin D deficiency in approximately 53% of Europeans.

For analysing vitamin D levels directly in the dental practice, botiss offers the botissCARE Cube Reader. In combination with the reliable 'botissCARE Vitamin D Test', the vitamin D level can be accurately determined within 15 minutes.

The European Food Safety Authority (EFSA) recommends a daily vitamin D dose between 400 and 4000 IU/day. However, even with daily doses above 2,000 IU of vitamin D, the otherwise positive effects of vitamin D on calcium incorporation into bones and the removal of calcified plaques from blood vessels can be reversed.

For more information visit <https://botiss.com/botisscare/>.

botiss biomaterials, the international expert in bone and soft tissue regeneration, offers botissCARE as a convenient chairside solution for measuring vitamin D levels, as well as an easily administered and effectively absorbed vitamin D3+K2 spray to prevent deficiency.
