

NEW TOOTHBRUSH RANGE FOR CHILDREN

Tooth decay is particularly common in children, with many factors such as diet, oral hygiene, and access to dental care key in its development. By offering oral hygiene advice at a young age, patients are able to gain the confidence to maintain their oral health at home.

For young children, recommend the CLASSIC 04 KIDS toothbrush range. These brushes have long handles to make it easier for parents to help children brush their teeth. When children are ready to brush on their own, recommend the CLASSIC 09

JUNIOR range which features slightly broader handles to make brushing easier. Both ranges have soft bristles to deliver a good clean while being gentle on the gums.

To find out more about the full range of products form TANDEX, get in touch with the team today.

DELIVERING IMMACULATE FLOORS FOR YOUR PRACTICE

The newly redesigned range of Multiwash PRO scrubber dryers will wash, scrub and dry your floors in just one single pass. Giving improved cleaning results, your floors will be left clean and dry, ready for patients and staff to walk on.

Features include:

- Increased brush diameter and improved motor gives 12% more scrubbing power providing an even better cleaning performance
- Improved aesthetics and ergonomic design
- A durable, no-marking, hard shell for protection of your machine and surroundings
- Increased use of engineering plastics eliminating any corrosion
- One simple push button to dispense cleaning solution
- Handle is easier to assemble to the base
- Improved tank connection
- Improved quick disconnect solution system

- Optional 7 litre tank for greater productivity
- All models come with pump as standard
- Fully enclosed spray nozzle for improved aesthetic and greater protection when cleaning under low level items
- Feature added to prevent the recovery tank lid touching the drum, especially if using it for carpet encapsulation.

There are three models available featuring different cleaning widths and capacities, ensuring you have a scrubber dryer that directly meets your requirements. The Multiwash PRO range is ideal for hospitals, clinics and nursing homes where hygiene is of the utmost importance.

The scrubber dryer is effective on all floors with brushes available for carpets, hard floors and entrance matting. Counter-rotating cylindrical brushes scrub and lift dirt and water onto a rotating recovery drum to pick up solution, leaving floors ready to walk on in minutes. It is quiet in operation and has accessible and removable tanks for fast filling, emptying and cleaning. It is also available in three different cleaning widths.

Truvox International's Multiwash PRO 240 is pictured in use at SmileLux Specialist Orthodontic Centre in Milton Keynes.

THE SECRET TO LONG-LASTING, HEALTHY DENTAL IMPLANTS

Dental implants are a fantastic option for patients looking to replace their missing teeth. But, without vigorous oral hygiene, there is an increased risk of dental disease.

The Curaprox interdental brushes are ideal for a range of different patient needs, including those with implants. The ultra-fine, extra-long filaments on the brush are able to bend gently around the teeth and implant crowns, removing any debris and ensuring the mouth is clean and fresh. They can even clean those hard-to-reach spots where bacteria can collect and thrive.

Patients will appreciate their ease of use, in addition to the colourful yet functional Swiss design. They simply ease into each interdental space, and out, and that's it. Simple and easy.

Help your patients enjoy their smiles, with a gentle yet effective solution. To find out more, visit the website today.
