

EASY TO USE ORAL HYGIENE TOOLS

To help patients maintain good oral hygiene practices between routine appointments, consider recommending easy-to-use tools, like a Waterpik Water Flosser.

This innovative solution is clinically proven to be twice as effective as string floss for reducing gingival bleeding. It is also an

effective alternative to subgingival antibiotics for periodontal maintenance.

It need only be used for one minute each day in order to deliver benefits to your patients, making it simple to integrate with an existing oral hygiene routine.

To find out more, why not book a Lunch & Learn session at your practice with one of Waterpik's passionate Professional Educators?

For more information on Waterpik Water Flosser products visit www.waterpik.co.uk. Waterpik products are available from Amazon, Costco UK, Argos, Boots, Superdrug and Tesco online and in stores across the UK and Ireland.

Join the 3,000+ dental teams who have already benefitted from a professional Waterpik Lunch & Learn. Book your free session for one hour of verifiable CPD and a free Waterpik Water Flosser – available either face to face or as a webinar – at <http://www.waterpik.co.uk/professional/lunch-learn/>.

ORAL CANCER SCREENING IN EVERY APPOINTMENT

Routine dental check-ups are the ideal time to check if your patients are showing signs of oral cancer. For your peace of mind, the BeVigilant OraFusion System from Vigilant Biosciences enables you to carry out a quick, non-invasive test during each appointment. The system analyses the saliva to easily identify the presence of biomarkers associated with oral cancer. In 15 minutes or less, it produces a report of either low, moderate, or elevated results.

Visit <https://totalmj.co.uk/products/bevigilant-orafusion/> for more information.

CREATE BESPOKE CLINICAL NOTES, WITH EASE

Do you find that note taking takes you away from spending time with your patient? When you take clinical notes using Kiroku, note taking becomes much quicker and easier.

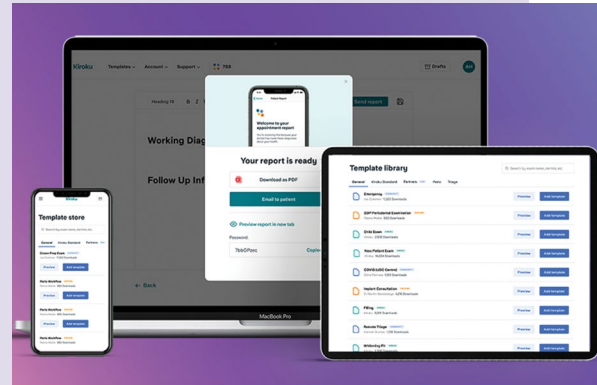

Kiroku features dynamic clickable templates, which allow you to take complete and accurate notes, thanks to helpful prompts produced for each appointment type. This makes it far easier for clinicians and their teams to keep comprehensive records for every patient, without taking

time away from their appointments.

Each bespoke Kiroku template follows a logical process, allowing you to carry out structured appointments to suit your workflow.

For more information about how Kiroku can improve the quality of your clinical notes, contact the team today.

To find out more about Kiroku, or to start your free trial, visit <https://trykiroku.com/>.

RELIEF FROM PROTRUDING ORTHODONTIC WIRES AND BRACKETS

Successful treatments with braces are made even better when the process is comfortable for patients. Alleviate the pains of protruding wires and brackets with the Kemdent

Orthodontic Relief Wax.

Portable in a small, recyclable tin case, patients can simply apply the wax over any unwelcome elements to make the transition more forgiving in the first few weeks of their treatment, where discomfort is often at its greatest.

Simple to shape through the warmth of their hands, it can be easily moulded into place on the metal edges of a bracket,

protecting the gingiva and buccal tissue. It harmlessly breaks down and flakes away with time, or can be simply peeled off.

This way, patients can go about their day and remove or reapply the comforting solution either side of meals and sleep.

To learn more about Kemdent Orthodontic Relief Wax, and the opportunity to improve patient experiences with braces, contact the team today.

For more information about the leading solutions available from Kemdent, visit www.kemdent.co.uk or call 01793 770 256.
