

ENHANCE YOUR SMILE THE NATURAL WAY

lavera – the certified natural and organic, award-winning skincare brand – have launched a new line of toothpastes. All the toothpaste formulas are titanium dioxide free, certified vegan, provide sustained protection to keep teeth and gums healthy and come in sustainable packaging made from recycled and recyclable material.

Complete Care Toothpaste is a highly effective formula that reliably removes plaque, protects against gum problems and provides cavity protection. Sodium fluoride inhibits the formation of plaque thus counteracting tooth decay while organic mint leaves the mouth feeling minty fresh.

Sensitive & Repair Toothpaste helps to remineralise the tooth enamel and reduce sensitivity. Organic chamomile is well-known for its soothing properties while

sodium fluoride inhibits the formation of plaque thus counteracting tooth decay. The product leaves the mouth minty fresh and provides teeth with 24-hour protection.

Sensitive Whitening Toothpaste is an enamel-friendly whitening toothpaste that contains organic coconut oil and mineral cleansing particles. Organic coconut oil contains antibacterial agents that prevent cavities while mineral cleansing particles thoroughly clean the teeth (preventing new stains forming) and remove surface stains. This toothpaste leaves the mouth feeling minty fresh.

lavera is available from all good health stores, pharmacies and online at www.lavera.co.uk. Dental practices can purchase lavera from Pravera Ltd: www.praveratrade.co.uk.

ANTIBACTERIAL PROTECTION WHERE IT'S NEEDED

Do you want to offer your patients the benefits of chlorhexidine and Citrox? Easy!

The Perio plus range of oral rinses from Curaprox makes it simple to provide key antibacterial ingredients to those who need them.

With options including Forte, Protect, Regenerate, and Balance – each including different chlorhexidine concentrations – clinicians can easily tailor their recommendations to each patient. The range is ideal for those who have had oral surgery, or who have heavily irritated gingiva, as Citrox – which is naturally extracted from bitter oranges – ensures long-lasting antibacterial effects.

To find out more about the Perio plus range, contact the Curaprox team.

For more information, visit www.curaprox.co.uk and www.curaden.co.uk.

WEBINAR: PRACTICE AGREEMENTS – AVOIDING THE PITFALLS

Join the Dental Defence Union (DDU) on 18 June 2024 for the latest in their series of dental webinars, delivered by the DDU's expert team of dento-legal advisers.

This webinar will be on the importance of associations, self-employed dental hygienists and dental therapists having a good contract with the practice. A clear contract that is fair for both parties can help prevent disputes from arising.

The DDU's John Makin and Eric Easson (pictured) will explore some of the common clauses seen in contracts and discuss how to ensure they are fair and reasonable for everyone.

Visit the DDU's website to learn more and register your place: <https://www.theddu.com/learn-and-develop/webinars>.
