

# Dental products and services

Please send product news information and images to Kate Quinlan at [k.quinlan@nature.com](mailto:k.quinlan@nature.com). Product news is provided as a service to readers using text and images from the manufacturer, supplier or distributor and does not imply endorsement by the *BDJ*. Normal and prudent research should be exercised before purchase or use of any product mentioned.

## Don't make headlines for the wrong reasons

A recent news piece has revealed that over 500 patients have been recommended to get tests for HIV and other blood-borne diseases following the use of unclean equipment at a dental practice in Hertfordshire.

As well as being a scary time for these patients, this once again highlights the importance of proper infection control in dental practices. Make sure you're compliant and are protecting your patients from these risks by using a trusted autoclave such as the Little Sister SES 2020N from Eschmann.

Able to accommodate five full size instrument trays and perform rapid cycles with active drying, the autoclave is fully geared towards the needs of the modern professional.

Keep it sterile, keep it safe with Eschmann.

For more information on the highly effective and affordable range of decontamination equipment and products from Eschmann, visit [www.eschmann.co.uk](http://www.eschmann.co.uk), follow on Twitter @LittleSisterSES or call 01903 753322.

## Excellent fracture toughness

When failure is not an option, discover the strength of everX Flow, a short-fibre, reinforced flowable composite designed to replace dentine and reinforce even the largest restorations while simultaneously preventing them from cracking. Thanks to its incredible strength, easy application and two shades for every clinical need, everX Flow is the ideal choice for any restoration needing a strong core and for core build-up preparations.

Offering high wear resistance and superb aesthetics, what makes everX Flow stand apart is its excellent fracture toughness, close to that of dentine, due to the high amount of short fibres strongly bonded to the resin matrix. Its thixotropic viscosity allows it to adapt perfectly to the cavity floor without slumping, even when placed in upper molars.

everX Flow's Bulk shade offers a depth cure of 5.5 mm, ideal for deep posterior

cavities, while the Dentine shade has a depth cure of 2 mm for highly aesthetic results and core build-up.

## An innovative atraumatic extraction system

Laramie Medical Solutions is proud to be sponsoring and hosting a hands-on CPD accredited training course being delivered by Professor Thomas Dietrich and Dr Phil Thompson from the University of Birmingham Dental School on Friday 27 September 2019 in London Euston. This is a unique practical opportunity to use the BENEX extraction system, to understand the correct technique and experience the merits of this innovative atraumatic extraction system.

Laramie Medical Solutions is offering a special deal on the BENEX system and all delegates attending the course will be able to purchase the system on the day for only £1,250 (excluding VAT). For further information, log on to the Laramie website and click on the events tab to register. Places are limited to 30 delegates.

Laramie Medical Solutions are proud to work in partnership with Helmut Zepf who have been manufacturing high quality dental instrumentation made in Germany since 1921.

The full range of products can be viewed and purchased via [www.laramiems.co.uk](http://www.laramiems.co.uk).
