Please send product news information and images to Kate Quinlan at [k.quinlan@nature.com](mailto:k.quinlan@nature.com). Product news is provided as a service to readers using text and images from the manufacturer, supplier or distributor and does not imply endorsement by the *BDJ*. Normal and prudent research should be exercised before purchase or use of any product mentioned.

## Sustainable products to reduce plastic waste

Independent dental handpiece experts Trigiene Dental has announced the launch of its reusable Eco Repair Box and a new eco range of sustainable products which aim to greatly reduce the sector's heavy reliance on single-use plastic.

The dental sector traditionally uses equipment which is sterilised and often wrapped in plastic alongside numerous single-use items including face masks, gloves and cups.

Middlesbrough-based company Trigiene Dental is leading the way to reduce this wasteful reliance on plastic items across the sector. Its new cardboard Eco Repair Box offers a sustainable alternative to traditional plastic padded envelopes which means that the equipment repair process is much more sustainable.

The family-owned business has also launched an extensive eco range of everyday consumables, including recycled hand towels made from recycled TetraPak cartons, biodegradable nitrile gloves and paper cups with waterproof natural starch lining. This is just the start of a vast range of eco products that will help dental practices further reduce their impact on the environment.

Trigiene Dental is an authorised independent distributor for major brands including Bien-Air, NSK, W&H, MK Dent, Densply Sirona and Anthogyr. Trigiene is also committed to delivering the fastest and most secure handpiece repair service available, with a 24-hour turnaround.

## Popular wipes have had a makeover

As the biggest-selling product of Nuview's Continu range, the 2-in-1 wipes have had a makeover. These wipes are now supplied in smart, pre-printed refill pouches, replacing the original clear pouches with a sticker label.

Continu 2-in-1 wipes are not only Class IIa CE marked for the cleaning and disinfection of medical devices within surgeries, but are also suitable for general surfaces. They provide fast, effective and long-lasting disinfection, whilst also ensuring surfaces are clean and decontaminated for highest levels of compliance with HTM 01-05.

Order your own Continu 2-in-1 wipes by contacting the friendly team at Nuview.

For more information call Nuview on 01453 872266, email [info@nuview-ltd.com](mailto:info@nuview-ltd.com), visit [www.nuview.co](http://www.nuview.co) or 'like' Nuview on Facebook.

## Cutting-edge implant method

When referring your patients for dental implant treatment, it's essential to work with a clinical team that utilises cutting-edge techniques.

The Centre for Oral-Maxillofacial and Dental Implant Reconstruction is based at the Manchester ICE Hospital and has been recognised as one of only 20 international ZAGA centres around the world. Professor Cemal Ucer, Specialist Oral Surgeon, gained accreditation following training with Dr Carlos Aparicio in Barcelona.

The ZAGA method (Zygoma Anatomy-Guided Approach) focuses on adapting clinical tools and concepts to the patient's anatomy, rather than the other way around. It is a philosophy centred primarily on patient wellbeing.

Discover how the experienced team at the Centre for Oral-Maxillofacial and Dental Implant Reconstruction could help your patients today.

Contact Professor Ucer at [ice@ucer.uk](mailto:ice@ucer.uk) or Mel Hay at [mel@mdic.co](mailto:mel@mdic.co) or call 01612 371842.
