

Powerful cleaning and whitening

Arm & Hammer toothpaste is powered by baking soda, which is low abrasive and works its way around the mouth cleaning areas that other toothpastes cannot reach.

Arm & Hammer Charcoal White toothpaste contains activated charcoal and is clinically proven to remove up to 100% more surface stains than regular toothpaste. In just three days, your patients can benefit from a brighter, whiter and healthy smile. Arm & Hammer Charcoal White smooths surface imperfections and offers enamel gloss.

For more information about the carefully formulated Arm & Hammer toothpaste range, visit <http://www.armandhammer.co.uk> or email ukenquiries@churchdwight.com.

Arm & Hammer oral healthcare products are available at Boots, Superdrug, Sainsbury's, Tesco, Asda and Morrisons throughout the UK.

The ultimate solution to surface disinfection

For the latest in dental decontamination, the new Polti Sani range from Henry Schein Dental provides a rapid method of daily surface steam disinfection, treating surfaces in seconds and drying quickly leaving no residues. Thanks to patented Superheated Chamber technology, the dry saturated steam, superheated to a temperature of 180°C, kills over 99.9% of viruses, germs, bacteria, fungi and spores [Tests carried out by third party and independent laboratories attest that Polti Sani System kills up to 99.999% of viruses, germs, bacteria, fungi and spores].

Henry Schein Dental now supports the Polti Sani range with three different options to suit all requirements:

- Polti Sani System Pro is an appliance for steam disinfection of all surfaces, fabrics and objects. In combination with HPMed detergent, the steam is emitted in cloud form over the surfaces to be sanitised, allowing rapid evaporation and disinfection to take place without contact

- Polti Sani System Business for all surfaces and fabrics, uses only tap water and HPMed detergent, with no need for chemical disinfectants. Ideal for small environments and effective against odours, its compact design allows it to be used in even the most limited spaces
- Polti Sani System Check is the ideal disinfection system for multiple operators and/or environments to be treated. Its sophisticated electronic system provides the option to print a record of the times, frequency and operators of all decontamination operations, perfect evidence for CQC audits.

For further information, or to request a FREE one-to-one consultation with one of Henry Schein's specialist equipment team, call 0800 028 4870 or visit hsdequipment.co.uk.
