Please send product news information and images to Kate Quinlan at k.quinlan@nature.com. Product news is provided as a service to readers using text and images from the manufacturer, supplier or distributor and does not imply endorsement by the BDI. Normal and prudent research should be exercised before purchase or use of any product mentioned.

Latex-free protection

Did you know that professionals who routinely wear latex gloves are more likely to develop latex allergies in the future?

To combat this, Initial Medical has a huge array of gloves available for professionals, meaning that you need never worry about latex allergies again. Available in a wide selection of sizes and colours, the glove ranges from Initial Medical also include an expansive choice of materials, meaning that you can always find the perfect pair for all of your staff.

Prevent allergies and protect your hands by contacting Initial Medical today. For further information visit www.initial.co.uk/medical or call 0870 850 4045.

Leading the fight against airborne pathogens

With infection control a number one priority for patient and staff safety, the new Radic8 air purifier range from Henry Schein Dental offers even greater protection and peace of mind. Ideal for waiting rooms and surgeries, Radic8's patented core technology neutralises over 99.9999%* of airborne and droplet viruses in a single air pass, through a combination of filters and air sterilisation, even neutralising mercury vapour and other gases.

The Radic8 range comprises three options, with alternatives suitable for different sized rooms. The Radic8 Viruskiller VK401, suitable for surgeries and spaces up to 60 m², and the VK103 for waiting rooms and spaces up to 100 m², safely drag contaminated air away from the breathing zone and replace it with clean air. Whilst the Radic8 Hextio neutralises all dangerous airborne particles and is a perfect compact air steriliser, providing a powerful and portable solution for smaller rooms and spaces up to 20 m².

The Radic8 air purifier range offers:

- Low running costs
- Simple 'Plug & Play' installation and maintenance
- 12 months' 0% finance available.

*The Radic8 range has been tested against coronavirus DF2 (not SARS-CoV2), adenovirus, influenza virus and poliovirus.

Innovation meets style

LM Arte is a set of innovatively designed instruments for aesthetic restorations, especially composite layering.

Available from J&S Davis – a brand synonymous with industry-leading quality – LM Arte instruments were developed in conjunction with Style Italiano, a study group of clinicians and researchers passionate about restorative dentistry.

The comprehensive range is colour-coded and named to enable a simple workflow and includes solutions for transporting and modelling composite in even the hardest to reach areas of the mouth. Made from LM-DuraGradeMax supersteel, the instruments are also strong and durable.

With the LM Arte range of instruments, J&S Davis has once again brought you the perfect blend of innovation and style.

For more information on the industry-leading products available from J&S Davis, visit www.js-davis.co.uk, call 01438 747 344 or email jsdsales@js-davis.co.uk.

Invest in your future

For anyone looking to take advantage of the depressed stock market right now, investing wisely could bring financial reward in the long-run.

There are several different approaches to take in order to protect your investment and maximise on the opportunities available. Whether you work on a pound-cost average, buy dividends or focus on consumer staples, the key to success will be in choosing the right shares with the right companies at the right time.

For bespoke advice and support in this and any other financial matters, the IFAs from money4dentists are here to help. Just give our team a call to find out how we could help you optimise your financial situation in the weeks, months and years to come.

For more information call 0845 345 5060 or 0754DENTIST. Email info@money4dentists.com or visit www.money4dentists.com.
