Hitting the big screen this November

This November, COLTENE will hold its first CinePosium, a symposium with a cinema atmosphere.

This blockbuster event will feature some of the biggest dental stars in Europe, with specialists from endodontics and restorative dentistry presenting LIVE from Athens, Berlin, Milan and Warsaw. They will deliver lectures from their respective cinemas, with a virtual round table and discussion in between.

Or, you can experience CinePosium online and join the event remotely. You can still exchange views and ideas with the growing and vibrant COLTENE community, and pose questions to the VIPs, under the motto 'From Root to Crown'.

Tickets are limited, for more information and registration, visit cineposium.coltene.com. Also see https://colteneuk.com/ cineposium-video.

For more on COLTENE, visit www.coltene.com, email info. uk@coltene.com or call 0800 254 5115.

Surgical face masks direct from Yorkshire

To help keep the UK protected during the pandemic, Bluetree Group has diversified its production line to become the first UK business to offer a face mask subscription service where professionals can purchase type IIR surgical face masks. Having secured contracts to supply face masks to the NHS and *Daily Mail's* charity, *Mail Force*, Bluetree Group was ramping up to produce 20 million masks per week in September from their base in South Yorkshire.

Bluetree Group's type IIR 3-ply splash resistant surgical mask is made with a Bacterial Filtration Efficiency ≥99%. These masks are ideal for laypersons, medical professionals and key workers exposed to blood and other bodily fluids. Complete with elasticated ear loops

and integrated wire nose bridge, they ensure a secure and comfortable fit for the wearer. For more information on Bluetree Group's face masks, visit: https:// bluetreemaskbox. co.uk/.

Your single shade solution for everyday cases

With the incredible shade matching properties of ONE shade, the restoration seamlessly blends with the surrounding tooth structure – ideal for Class I occlusal cavities.

Efficient handling: Venus Pearl and Venus Diamond do not slump when placed, remaining exactly where you place them to allow for precise carving. The main difference is in their consistency, giving you the option of a creamy or firmer handling.

Long-lasting restorations: exceptional strength to resist chipping and fracture, demonstrated with over ten years of successful clinical results.

One colour for all: thanks to the amazing adaptive light matching, Venus Diamond ONE/Venus Pearl ONE colour determines the shade of the restoration by absorbing the lightwaves that are reflected by the surrounding tooth shade.

The handling is exactly the same as the respective market leading composites, Venus Pearl and Venus Diamond, that have won numerous awards from independent research organisations, such as Reality and The Dental Advisor.

The following handling qualities apply to all Venus Pearl and Venus Diamond shades, including the respective ONE shades:

- Non-slumping stays precisely where it's placed
- Extended working time allowing time to carve
- Handling consistency
- Venus Pearl = creamy
- Venus Diamond = firmer.
