

Dental products and services

Please send product news information and images to Kate Quinlan at k.quinlan@nature.com. Product news is provided as a service to readers using text and images from the manufacturer, supplier or distributor and does not imply endorsement by the *BDJ*. Normal and prudent research should be exercised before purchase or use of any product mentioned.

The world's leading digital full-arch workflow

Chrome offers pioneering full-arch stackable guide technology and was developed for dentists who desire a pre-planned, predictable guided 'All-On-X' type of surgery.

If you would like to try Chrome for yourself, for a limited period the Quoris 3D team is inviting dentists to take up their offer of a free case evaluation. Simply send a CBCT and retracted side-on and face-on photos and they will evaluate the case with you.

In its entirety, the Chrome service delivers anchored bite verification, anchored bone reduction, anchored site drilling, accurate anchored provisionalisation, and a method of transferring all surgical and restorative information for the final restorative conversion phase.

Data suggest that 95% of all clinicians who try Chrome go on to use it a second, third and fourth time, so what are you waiting for?

For further information, contact Orla Sheehy, Sales Manager Ireland & Scotland, on +353 874512000 or Amanda Williams, Sales Manager England & Wales, on 07769 353598.

Alternatively, visit <https://quoris3d.com> or email chrome@quoris3d.com.

Dental handpiece experts at your service

Truly one of a kind, family-run Quintess Denta has decades of experience, expertise and excellence in handpiece repair and maintenance.

They are more than a repair or sales company; they are an integral part of your practice.

Quintess Denta guarantee high-quality services and competitive prices. Their restoration centre covers repairs to most popular handpiece brands, with expertise in fixing electric and air turbines as well as scalers.

Quintess Denta's technicians replace bearings, gears, O-rings and seals, and have a reputation for being able to repair even the most demanding of devices to the highest standard.

Quintess Denta thinks that alongside supplying excellent products, their clients deserve a quick, reliable and efficient service delivered with a personal touch.

To find out more about Quintess Denta, contact Ian Creighton on +353 (0)1 691 8870, email ian@quintessdenta.com or visit <https://quintessdenta.com>. Alternatively, request your FREEPOST repair pack at <https://quintessdenta.com/products/freepost-repair-pack-new>.

Essential waste disposal for used lateral flow testing kits

Initial Medical is one of only a few UK companies currently providing waste disposal for used lateral flow testing kits (COVID-19 tests).

Initial Medical is providing dedicated clear waste bags to customers for all used lateral flow testing kits, with the option of internal containers and external wheelie bins depending on the service required. It is also offering a safe and highly efficient collection and disposal service specifically for this type of waste.

Lateral flow testing kits have been deemed chemical waste by the Department of Health, meaning that they require disposal by incineration in order to protect people's health and the environment. With the vast majority of waste disposal and treatment centres across the UK currently at capacity due to the extra PPE waste being generated, Initial Medical has secured additional capacity at several disposal sites, to ensure it can help to meet the anticipated demand for the disposal of used lateral flow test kits.

No matter what industry or type of business you're in, if you are utilising lateral flow testing kits to provide COVID-19 testing for your workforce, find out how Initial Medical could support you with the

safe and essential disposal of used lateral flow tests.

Find out more by contacting Initial Medical today.

For further information visit www.initial.co.uk/medical or call 0870 850 4045.
