The new standard in adhesive dentistry

Leading the way in adhesive dentistry, new G2-BOND Universal with GC's proprietary Dual H-Technology brings clinicians everything they expect from self-etch and etch-and-rinse gold standard products.

The Dual H-Technology of G2-BOND Universal enables optimal bonding of tooth and composite by the smooth transition from hydrophilic to hydrophobic characteristics. The HEMA-free composition and hydrophobic bond layer lowers the occurrence of water sorption, decreasing the risk of degradation while ensuring superior durability.

The optimal thickness and flexural strength of G2-BOND Universal may act as a shock absorbing layer to avoid gap formation and debonding, especially with high shrinkage and bulk-fill composites. Its unmatched marginal quality and strong, aesthetic bonding layer prevents microleakage, leading to remarkable sealing effectiveness and virtually no post-op sensitivity.

G2-BOND Universal's modern, ergonomically designed 2-bottle system allows precise dispensing, prevents dripping, eliminates waste and ultimately saves costs. The viscosity of the bond makes it easy to apply, limiting the risk of pooling of the bonding layer.

G2-BOND Universal is ideal for use in a multiple range of indications including direct restorations, immediate dentine sealing (IDS), repair of indirect restorations and treatment of exposed root surfaces and hypersensitive teeth.

For more information on G2-BOND Universal contact GC UK Ltd on 01908 218999, email info.uk@gc.dental or visit www.gceurope.com.

Best-in-class clinicians and state-of-the-art facilities

European Dental Group (EDG) have acquired a majority stake in Dental Beauty Partners (DBP), a rapidly growing dental care provider based around London, to partner with the company and support its next phase of development.

DBP provides a range of both NHS and private dental services through a partnership model, expanding from one to 14 partner-led practices around London since 2019. They have built a successful reputation for revamping existing dental practices by bringing in best-in-class clinicians, implementing quality measures and delivering the highest clinical standards, while investing in state-of-the-art facilities and developing a digital patient journey. DBP prides itself in its strong focus on the personal and professional development of its personnel via providing world class mentoring, courses and personal development for all team members.

EDG has been operating a clinician-led dental service organisation for many years across five countries in Europe.

New free CPD finder site

Mydentalcpdfinder.co.uk is a new, free site which helps users find both free and paid-for CPD without having to laboriously search individual providers and websites; the site has already done this for you.

Mydentalcpdfinder.co.uk solves two key problems for all dentists and dental team members: how to find free CPD all in one place and how to find subject-specific CPD to complete personal development plans (PDPs). Allocating the available CPD into subject categories Mydentalcpdfinder.co.uk also provides a summary of the content, amount of CPD and a link to the provider, improving choice and saving time in finding appropriate courses.

Mydentalcpdfinder.co.uk also gives the user the opportunity to sign up for free e-alerts when new CPD in specifically requested subject areas becomes available. Launched with over 150 CPD opportunities Mydentalcpdfinder.co.uk is a must: a one-stop site for seeking all your CPD needs.
