

Protective shield wins award

Mats Norman, dentist and Head of Operations at Tandläkarna Norman in Uddevalla, Sweden, has been awarded the Gold Heart, a prize instituted by Praktikertjänst, in the category best innovation. Together with Orsing, Mats Norman developed his idea of CareShield: from PET-bottle to finished product.

CareShield is an easy-to-use transparent screen with an integrated HVE suction function that removes droplets and aerosols that harbour potentially dangerous pathogens.

During dental procedures, dentists, dental hygienists, dental nurses and patients are exposed to aerosols and organic fluids such as blood and saliva. These fluids spread and contaminate personal protective equipment as well as surfaces around the clinic. CareShield helps reduce cross contamination by removing aerosols and droplets through your HVE system during treatment. Easy to connect and use, CareShield ensures prevention contamination procedures for you and your patients.

A simple solution to your air supply

Looking after your air supply shouldn't be complicated.

That's why DENTALAIR UTILITIES aims to revolutionise your air supply with Air to the Chair.

Air to the Chair is easy, all you need to do is log onto www.dentalair.com and select the 'New Air Supply' option from the top of the screen.

Following this, indicate how many chairs you need an air supply for and you will instantly be given a fixed subscription price. This includes a brand new air supply, written documentation to assist with inspections, regular maintenance and complete breakdown cover.

There are no credit checks necessary and DENTALAIR UTILITIES always works around your schedule to provide an exceptional level of customer service!

To find out more, visit the DENTALAIR UTILITIES website.

For more information, contact DENTALAIR UTILITIES at info@dentalair.com or call 0800 975 7530.
