

Amalgam disposal done correctly

The correct disposal of amalgam is integral to avoid its discharge into sewerage systems and waterways. The PureMotion amalgam separator from Initial Medical is intuitively designed for the safe and efficient extraction of amalgam waste, achieving up to 99.8% removal from your waste water stream. The PureMotion amalgam separator has simple 'plug and play' fixtures and fittings, which allow it to seamlessly retrofit against your dental practice's existing wastewater systems.

Initial Medical will also provide a professional installation from one of their expert dental engineers, with no downtime to the practice. To support your business's needs, Initial Medical will also replace the amalgam separator at regular service intervals.

Ensure that your dental practice is meeting amalgam waste compliance, and invest in the innovative PureMotion amalgam separator from Initial Medical.

For exceptional implant procedures

When it comes to dental implantology, success is heavily influenced by initial implant stability.

With Implantmed and the Osstell Beacon from W&H, you can streamline your dental implantology workflows and provide more predictably stable implants with ease.

The Implantmed unit includes features such as automatic thread cutting, accurate torque control and documentation recording. In conjunction with the Osstell ISQ module or standalone Osstell

Beacon, the unit can also measure implant stability in mere seconds. Using Osstell, you can log the implant's Implant Stability Quotient – giving a reliable measurement of current stability and ensuring that everything is in place for more reliable osseointegration.

Help your dental implant procedures become exceptional by contacting W&H today.

Welcome to the best smile of your life

With the introduction of the 'ugly duckling' Triple Headed Toothbrush, Trycare have launched a paradigm shift in electric toothbrush heads that makes the Philips Sonicare even more effective, in fact three times more effective!

Designed by a dentist, the 'ugly duckling' Triple Headed Toothbrush features individual labial, lingual and occlusal orientated brush heads which combine to provide the most thorough toothbrush experience your mouth has ever enjoyed, delivering three times more prophylaxis for a two-minute cycle.

Featuring patented angled brush heads that clean along the gingival margin and extra soft bristles that do not harm enamel

or gingiva, the labial and lingual heads are positioned at a 45° angle so they automatically brush perfectly every time. The three sides of the brush naturally adapt to the teeth so that it works on teeth of all shapes, sizes and positions.

Incorporating a built-in bristle indicator to let patients know it's time to change, 'ugly duckling' Triple Headed Toothbrushes are recommended for children eight years old and above. They are safe for use with implants and other restorations.

Got a Philips Sonicare? Contact your local Trycare representative for a free sample 'ugly duckling' today!
