

You won't believe the gleam

Trycare Ltd is the UK distributor for Eve surgical polishing tips and strips. Manufactured in Germany from premium grade materials, Eve polishing tips and strips enable clinicians to achieve the most natural lustre and shine on their restorations whatever they are made from.

The special geometry of Diacomp Plus Twist polishers enables clinicians to polish any surface with just one polisher, resulting in a high shine and significant time saving. Offering extraordinary durability, surface structure preservation and reduced heat generation they can be autoclaved in excess of 25 times.

Diacomp Plus Occluflex is Eve's unique occlusal polisher. It has been designed to achieve high quality results on otherwise difficult to access occlusal surfaces. The twisted filaments reaching right down to the deepest fissures. They produce a high-shine without the need for polishing pastes.

Both are used in a simple two-step process. First the pink pre-polisher is used to smooth the restoration after using a gross anatomy trimmer. Then the grey fine polisher is used to produce the final high shine finish that really makes restorations gleam. Perfect for use with Tokuyama spherical particle composites, which deliver their own exceptional lustre and finish.

Coming to a town near you!

The CHROME Roadshow, brought to you by Quoris 3D, was launched on 14 November to great excitement at a press briefing at the L.S. Browne Centre in Ireland.

The CHROME Roadshow is poised to take this world-leading, fully guided arch system throughout the UK for the first time, to give all dentists a chance to see for themselves how completely systemising their full implant arch work, from record taking to final restorations, is an unprecedented winner.

By the end of November, the team had trained and educated 140 clinicians on CHROME GuidedSMILE, with 100 of the UK's top implant dentists already using the system in their practices.

In addition, the course has an 80% conversion rate from education to implant placement – an impressive outcome – which it is so important for the system to be experienced beyond the Irish border.

In summary, CHROME GuidedSMILE offers pioneering full-arch stackable guide technology and was developed for dentists who desire a pre-planned, predictable guided 'All-On-X' type of surgery.

In its entirety, the Chrome service delivers anchored bite verification, anchored bone reduction, anchored site drilling, accurate anchored provisionalisation, and a method of transferring all surgical and restorative information for the final restorative conversion phase.

As such, the system is ideal for dentists who know how to place dental implants free hand, are involved with full arch case, would like to progress their treatment offerings, and who want to make use of the incredible digital advancements that enable improved accuracy, efficiencies, and patient outcomes.

In addition, clinicians using CHROME GuidedSMILE become a member of CHROME Club, a tiered system of support

levels. The more cases you complete, the higher the tier achieved, and then you can access increasingly invaluable rewards.

Event invitees were also treated an exclusive insight into Quoris 3D's exciting future plans and the launch of new and exclusive technologies in the form of combining three patented technologies, Ivotion, Smileloc and CHROME GuidedSMILE, to give you Ivotion Guided Smileloc, which offers dentists a same-day, long-term fixed hybrid solution that can be priced for patients at half the traditional cost, as well as a sneak peek at CHROME University!

Over the course of one week only, each Roadshow event will provide an overview of CHROME GuidedSMILE, the TRIPOD of data, surgical and restorative steps, the business of CHROME GuidedSMILE, lunch and a hands-on session, and will run 9–3.30 pm at the following times and places:

- Monday 23 January, Hilton Hotel, Glasgow
- Tuesday 24 January, Hilton Deansgate, Manchester
- Wednesday 25 January, Hilton Brunswick Square, Birmingham
- Thursday 26 January, DoubleTree by Hilton, Bristol
- Friday 27 January, Hilton Paddington, London.

This is expected to be an event that sells out incredibly quickly and places will be allocated on a first come, first served basis, so don't delay in booking your place.

Priced at just £50, which will be donated to Women's Aid, a charity that Quoris 3D supports in Enniskillen, this is, without doubt, an all-round winner.

To book your place visit www.lsbrownecentre.com/course-calendar/ – or visit www.quoris3d.com for more information on CHROME GuidedSMILE.
