

## All the benefits of CHX without the side effects

Clinisept+ Dental Mouthwash provides a clinically-proven alternative to chlorhexidine (CHX) mouth rinses. It delivers superior antimicrobial benefits with no staining or effect to taste.

A uniquely formulated, next generation hypochlorous solution, Clinisept+ is non-toxic, non-irritant, hypoallergenic and anti-inflammatory, as well as having a neutral pH and not being subject to antimicrobial resistance.

If you compare the antimicrobial capability of Clinisept+ with chlorhexidine, Clinisept+ is far superior. Clinisept+, which is a next generation hypochlorous acid, is not just more effective against bacteria, but far more effective than chlorhexidine at killing viruses, and also spores.

This is a mouthwash that is more effective than chlorhexidine, but with none of the drawbacks or safety concerns of chlorhexidine.

To see the advantages for yourself, discover Clinisept+ today!

## Stand out from the crowd and design a truly unique dental practice

Vita Architecture is an award-winning graphics, interiors and architecture design studio focused on providing bespoke design services for dental practices across the globe. Based in London, UK, the company is well versed with CQC and HTM 01-05 regulations and approaches each and every project from a branding first mentality to ensure all designs and practices are as unique as the people who run them.

Vita Architecture's multidisciplinary design team includes talented graphic designers, interior designers and architects. This approach ensures that you're covered when it comes to a seamless transition from branding and logos to interiors and architecture. That way your brand message will remain consistent and truly unique throughout your business. To the centre of the company's designs, Vita Architecture looks to challenge the concept of the traditional clinical finish. Yes, compliant and hygienic spaces need to be delivered, but this shouldn't come at the cost of patient comfort. The company's belief

is that dental practices can be comfortable, unique and compliant without compromise.

Having setup in 2016 primarily as architects, Vita Architecture is well placed to guide your design and construction journey from the drawing board to the construction site including services such as planning, listed building consent, tendering and building regulations.

The company's current project workload spans across the UK, Lithuania, Singapore and Mauritius as well as projects that range from £30k to £12.5 million so there's no project that's too far, too big or too small. Most importantly for Vita Architecture is that their clients choose them as their collaborative partners to question, challenge and deliver spaces that go against the grain to create something genuinely special.

## Low protein, powder-free dental dams

Endo dentists will love HySolate Latex Dams, recently launched by COLTENE.

Choose HySolate Latex Dams for dental dams that are low protein and powder-free, reducing the risk of latex hypersensitivity. These products also offer strong retraction and reliable moisture control.

For the ultimate clear contrast, HySolate Black Edition is perfect. Pre-printed, you don't need to mark it before punching – fewer working steps means more efficient and cost-effective treatments.

For everyday and more complex cases, select a HySolate Latex Dam in the size and thickness you require. Different scents are available too, to suit you and your patient.

COLTENE is a world-leading manufacturer of tools and consumables for conservative, healthy, upgraded dentistry. From endodontics to all restorative applications and infection control, COLTENE have just what you need for better practice.

For more on COLTENE, visit [www.coltene.com](http://www.coltene.com), email [info.uk@coltene.com](mailto:info.uk@coltene.com) or call 0800 254 5115.
