

## A secure and predictable implant system

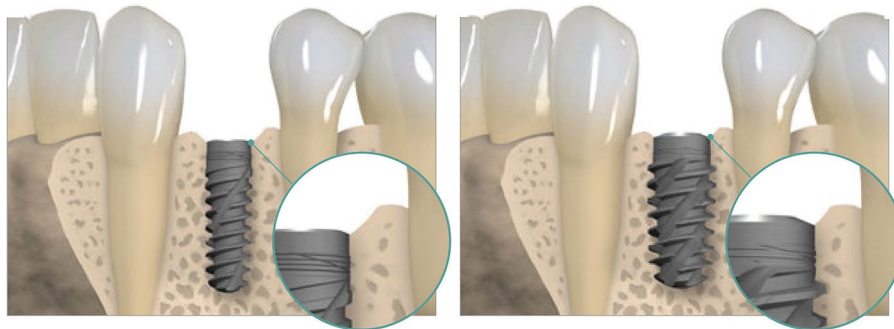

The Straumann BLX Dental Implant System is the intelligent concept designed to provide optimal stability in all bone types. Plus, with one prosthetic line for all implant diameters, it will streamline your workflows.

The BLX implant's full-length dynamic chip flute collects and condenses displaced bone chips and evenly distributes them around the implant. It features a reduced neck diameter specially designed to reduce stress on the crestal bone, a slim

and fully tapered implant core for a small osteotomy, and deep apical threads to provide a large anchoring surface for stability. Plus, its slim and under-contoured profile encourages maximum soft tissue preservation.

Consider using the Straumann BLX Implant System for your restorative cases for more stable and predictable outcomes.

For more information on the Straumann BLX Implant System visit [www.straumann-uk.co/blx](http://www.straumann-uk.co/blx).

## Introduce clear aligners into your practice

Clear aligners are a comfortable and convenient orthodontic treatment option for patients with malocclusion concerns. To familiarise yourself with this system, IAS Academy offers a Clear Aligners Level 2 course, giving you everything you need to handle a variety of cases.

The programme includes elements of theoretical and hands-on learning. In the morning delegates will cover topics including an introduction to advanced aligner treatments, treatment possibilities and limitations, arch evaluation and planning for more complex cases with different systems.

In the afternoon, there will be a hands-on practical for interproximal reduction with different techniques, case discussion with delegates' models and fixed and removable retention.

As a member of IAS Academy, individuals will also be able to access a mentor after the course, as well as receive clinical support and governance to keep you clinically safe.

For more information on upcoming IAS Academy training courses, visit [www.iasortho.com](http://www.iasortho.com) or call 01932 336470 (Press 1).

## Own your future and switch your indemnity

## Old-standard support

Initial Medical, a trading division of Rentokil Initial UK Limited, is dedicated to offering customers nothing but the best standard of service and support.

In light of this, Initial Medical is proud to announce that Rentokil Initial has recently been presented with the RoSPA Gold Medal Award for 2022.

This exclusive accolade is only given to companies that have achieved a very high level of performance, demonstrating well developed occupational health and safety management systems and culture, outstanding risk prevention and very low levels of error. To receive the Gold Award, companies have to maintain these exceptional standards for at least five years.

To find out more, get in touch at 0870 850 4045 or visit the website today [www.initial.co.uk/medical](http://www.initial.co.uk/medical)
