

For all your financial advice needs

With the economy heading into turbulent times, it's always a good idea to assess your finances and seek expert advice.

The multiple award-winning team at money4dentists is available to help you with any financial areas, whether that's taking out a new insurance policy, getting your taxes sorted for the year or advising about areas such as income protection.

money4dentists have spent decades working only for dentists, meaning that

they have a unique understanding of the dental profession. As such, they always tailor their advice to suit your individual circumstances, ensuring that you receive high quality guidance that won't let you down.

If you'd like to get in touch, contact the team at money4dentists today.

For more information call 0845 345 5060, email info@money4dentists.com or visit www.money4dentists.com.

Improve saliva flow by up to 200% in dry mouth patients

Xerostom from Oraldent provides a natural yet highly effective solution. It has been proven to increase salivary flow by up to 200%,¹ helping patients combat the damaging effects of dry mouth.

The product range includes various solutions designed to meet different patients' needs, including saliva stimulants, saliva substitutes and oral hygiene products in the form of mouth spray, pastilles, gel, toothpaste and mouthwash.

Xerostom contains only natural ingredients, providing a vegan- and diabetes-friendly formula with no harmful chemicals. Free from acids, detergents, SLS, sugar and alcohol, its patented formula of olive oil, betaine and xylitol provides

anti-inflammatory benefits. It also contains fluoride and calcium for remineralisation and caries protection and a selection of vitamins and minerals to promote tissue health and reduce sensitivity.

To increase salivary flow by up to 200% in patients with dry mouth while protecting their teeth from decay and erosion, discover Xerostom from Oraldent.

For more details, visit Oraldent.co.uk, call 01480 862080 or email info@oraldent.co.uk.

Synthetic bone material that doesn't wash away

Augma's Bond Apatite is a synthetic bone regeneration material that does not wash away, unlike other synthetic bone materials. Supplied in an all-in-one syringe that enables immediate dispensing directly into the bone defect, it is incredibly quick and easy to use. Simply depress the plunger to activate the ingredients, dispense it into the defect and apply pressure using a sterile gauze and it's set. The whole process takes seconds.

Bond Apatite sets hard, so it won't wash away even in the presence of blood and saliva. And, because it sets hard, there is no need for a membrane which saves additional time and unnecessary expense. There is no need to achieve tension-free closure, this is actually contra-indicated, or even complete primary closure for gaps less than 3 mm. Small dehiscences can be left exposed without any risk of infection or breakdown. Larger dehiscences can be protected by suturing a collagen cube over it.

Formed from a patented mixture of biphasic calcium sulphate and hydroxyapatite in a 2:1 ratio, bond apatite sets like a cement in the oral cavity, even in the presence of blood and saliva. After a few weeks it transforms into a radiolucent matrix, before calcifying and becoming radiopaque new bone. It produces 90% new bone after three months and over 95% new bone after eight months.
