

Achieve greater definition and sulcal depth

When patients have missing dentition, taking an accurate impression can be difficult. Ensure you achieve absolute accuracy every time with Kemdent Impression Compound Green Sticks.

Used primarily for border extensions on impression trays, these versatile sticks can also be used to modify a tray and build up material where teeth have been extracted, allowing for greater accuracy.

Highly viscous and excellent at capturing the full sulcal depth of the oral cavity, this solution is a must-have for

clinicians who value excellent detail and who want to ensure that their impressions are outstanding, every time.

For more information about the leading solutions available from Kemdent, visit www.kemdent.co.uk or call 01793 770 256.

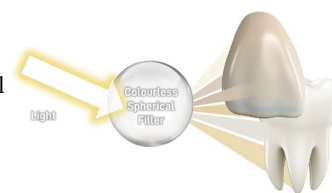

Happy New Year Gift!

Trycare are offering dentists a real Happy New Year Gift! Available in either syringe or PLT presentation, the Tokuyama Magic Colour Kit contains either a 4 g syringe or 20 x 0.2 g PLT of Omnichroma, a 3 g syringe of Omnichroma Flow, a 3 g syringe of Omnichroma Flow Blocker, and Universal Bond A&B. With a total value of £285 they are available for just £132. That's an incredible saving of £153, so less than half price! All prices and values quoted exclude vat.

The Magic Colour Kit enables clinicians to evaluate the complete Omnichroma range and Universal Bond. Tokuyama's Omnichroma is the world's only colourless universal composite. It is the only universal composite that can match every tooth colour no matter what the shade. Unlike its so-called competitors, Omnichroma colourless composite is indicated for both anterior and posterior restorations, not just posterior restorations!

In addition to all the inherent advantages associated with Tokuyama's patented spherical filler particles, employing Omnichroma within your practice means freedom from time-consuming and subjective shade-matching procedures; money saved on overheads and reduced waste from expired rarely used Vita shades; and no need to replace restorations after tooth bleaching.

For more information about the complete Tokuyama range, including Omnichroma, contact your local Trycare Representative, call 01274 885544 or visit www.trycare.co.uk.

The ultimate oral hygiene combination

Interdental cleaning is essential for an effective oral hygiene routine. Recommend the FLEXI interdental brushes from TANDEX to your patients to ensure a thorough daily interdental clean.

Getting the size right is important when it comes to interdental brushes. TANDEX interdental tools are available in a range of sizes, clearly identified by the ISO and PHD (passage hole diameter) numbers on the box. The FLEXI EDUCATOR tool helps to remind patients which size brush they should use in each interdental space. This is a fantastic tool to help your patients keep on track of their oral health.

TANDEX PREVENT GEL is the perfect addition to your patient's daily cleaning routine. When applied to the FLEXI

interdental tool, it strengthens enamel and offers an antibacterial effect, because it is formulated with 0.12% chlorhexidine and 900 ppm fluoride. Plus, it's non-abrasive and pleasant tasting.

Recommend this combination to your patients to ensure an effective clean as well as long-term prevention.

For more information on Tandex's range of products, visit <https://tandex.dk/>.

Tandex products are also available from CTS Dental Supplies <https://www.cts-dental.com/> and DHB Oral Healthcare <https://dhb.co.uk/>.

Natural, clinically proven relief from xerostomia

There are several different causes of xerostomia, though it is most often a side

effect of medications. No matter the cause, you need a solution you can trust to help patients fight the symptoms and improve their quality of life.

Consider Xerostom from Oraldent. Available by prescription by dentists, it is clinically proven to increase salivary flow by up to 200%.¹ The innovative product range contains only natural ingredients to deliver reliable relief from dry mouth symptoms. Available as a mouth spray, pastilles, gel, toothpaste and mouthwash, the unique formulas offer saliva stimulants, saliva

substitutes and oral hygiene support – meeting all patients' needs.

To find out more, visit the website or contact the team today.
