

Implant solution for challenging cases

The Helix Grand Morse implant system from Neodent, a Straumann Group brand, is the ideal solution for challenging cases. It offers stability, simplicity, and reliability to produce highly aesthetic results.

The implant provides a strong and stable foundation to ensure long term success. Its optimised design makes it suitable in challenging situations including for immediate placement and

soft bone. It features a combined tapered body with a hybrid outer contour and an Acqua hydrophilic surface to maximise primary stability and make immediate protocols more predictable. Consider using the Helix Grand Morse implant system from Neodent for your challenging cases.

For more information, visit <https://www.straumann.com/neodent>.

Free access to exciting resources

Members of the Association of Dental Implantology (ADI) receive free access to a range of exciting resources.

This includes free access to ADI Study Clubs, a free premium membership of Dental Tubules and free attendance to the biennial ADI Members' National Forum. There's also access to the ADI Members Only Facebook Group.

Plus, members also gain discounted delegate rates for ADI events, including the biennial ADI Team Congresses, Masterclasses and Focus Meetings.

Being an ADI member means you are part of a community that values and promotes exceptional dentistry and education. Find out more today by getting in touch with the team.

ADI Team Congress 2023, Dental Implants: Individual Excellence or Team Triumph, Birmingham, 4-6 May 2023.

ADI members can access the event at a heavily discounted rate, join today: www.adi.org.uk.

Transform your air supply

Maintaining your air compressor can be a time-consuming task.

With Air to the Chair from Dental Air, you can remove the stress and transform your air supply in the simplest way possible.

Air to the Chair includes next-day delivery and installation of a new, ultra-quiet air compressor. It also provides all necessary certification to prove compliance and 24-hour breakdown coverage, meaning that instead of stressing about your air supply you can concentrate on what really matters – providing exceptional patient care.

Air to the Chair is priced at just £5 per week per chair. To find out more, contact the team today. For more information, visit www.dentalair.com.

Managing complex orthodontic cases

IAS Academy is offering clinicians the opportunity to learn the skills to overcome complex orthodontic challenges with the Advanced Diploma Course – a two-year programme that leads to the College of General Dentistry's Diploma in Primary Care Orthodontics. Clinicians on the

course will learn how to utilise all appliance systems, including fixed functional, aligners, lingual and Inman, and covers all practical and theoretical of providing orthodontic care.

Over the course of the programme, clinicians will discuss cases and have access to webinars, participate in hands-on practical sessions and receive comprehensive mentoring, ensuring a complete educational experience. Recommended for dentists who treat a minimum of ten orthodontic cases per year and who are already familiar with fixed appliances, this is an outstanding opportunity for clinicians who want to hone their orthodontic skills.

To find out more, contact IAS Academy today. For more information on upcoming IAS Academy training courses, visit www.iasortho.com or call 01932 336470 (Press 1).

Keep the colour code fresh!

Correct waste segregation provides peace of mind that you are helping to protect the environment and minimise any chances of disease transmission.

But have you ever found that your team struggles to remember how to properly dispose of some waste items?

Initial Medical can help. Their Colour Coding Posters are an easy-to-understand visual reminder that can be displayed around your practice. Available in both standard and fun, colour code character versions, these posters are an excellent resource to help ensure that all waste is disposed of correctly.

You can download your FREE posters online at www.initial.co.uk/colour-coding-guide/.

To find out more, get in touch at 0870 850 4045 or visit the website today www.initial.co.uk/medical.
