Talk endodontics in Belfast in November

The British Endodontic Society (BES) Regional Meeting will be taking place in Belfast, Northern Ireland this November. This is a fantastic opportunity to discover the latest innovations in the world of endodontics, meet with colleagues who have a passion for endo, and explore the cutting-edge technology in the trade exhibition.

Enjoy Table Clinics presented by Dr Satnam Singh Virdee, Dr Nimit Patel, Dr Risha Patel, and Dr Asmaa Al-Taie as well as lectures delivered by Dr Paula Villa, Dr Daniel Cerny, Dr Byron Tsivos, and Dr Ernest Lucas Taule. Sessions will discuss a range of current topics in endodontics, offering delegates a fantastic opportunity to learn from and engage with expert speakers.

The BES Meeting will be held on 17–18 November at the International Convention Centre, Belfast.

For more information about the BES, or to join, visit the website www.britishendodonticsociety.org.uk or call 01494 581542.

Individually trained oral prophylaxis

Curaden is thrilled to announce that the individually trained oral prophylaxis (iTOP) course is officially back in the UK. Held at Clifton Hill House, Bristol on 18 November 2023, be sure to book your place to elevate your dental expertise and revolutionise oral health.

iTOP offers a fantastic opportunity to engage with industry leaders, like special guest speaker Paul Renton Harper. Attendees will master cutting-edge biofilm control techniques, collaborate with iTOP instructors, and elevate their expertise in the latest perio treatments. In addition to a day of learning, attendees will receive a take-home bag containing The Hydrosonic Pro, 5460 Travel Set, and Interdental Chairside Box.

Don't miss the revolutionary prevention-oriented programme for dental professionals. To secure your place, visit: www.curadenacademy.com/en/events/3805-itop-introductory-uk.

Establish design and manufacturing protocols in your practice

Dentsply Sirona, the world's largest manufacturer of professional dental products and technologies, and 3Shape, a leading innovator of digital solutions for dental patient care, have opened the next chapter in their workflow integrations. The harmonisation of DS Core, Primemill and Primeprint, with the 3Shape TRIOS intraoral scanner powered by 3Shape Unite, creates more integrated workflows for digital dentistry. Dentists and dental technicians will benefit from simple, secure, and connected technology solutions for effective collaboration which enables them to provide excellent dental care and move forward with confidence.

Dentsply Sirona intraoral scanners such as Primescan will now connect directly with the 3Shape Dental System Software via DS Core. Dentists will be able to easily transmit orders to their lab partners via DS Core. In the lab, this data can then be directly processed in 3Shape Dental System, which can save valuable time.

Dentists will be able to seamlessly connect TRIOS scanners to Primemill and Primeprint for in-office milling and printing via 3Shape Unite, DS Core and the inLab CAD software. Thus, high-quality prosthetic restorations such as permanent aesthetic crowns, as well as removable and temporary dental applications such as splints, temporary crowns or models can be manufactured directly in the dental practice same day.

For Dentsply Sirona and 3Shape, this is an important next step within their workflow integrations to advance digital dentistry in practices and labs and help improve oral health worldwide.

More information about Dentsply Sirona is available on the Dentsply Sirona website: www.dentsplysirona.com.

More information about 3Shape is available on the 3Shape website: www.3shape.com.

Due to the different approval and registration times, not all technologies and products are immediately available in all countries.
