

Planning on scanning?

Embracing intraoral scanning can enhance the patient experience – no more messy impression trays – and make workflows quicker and easier.

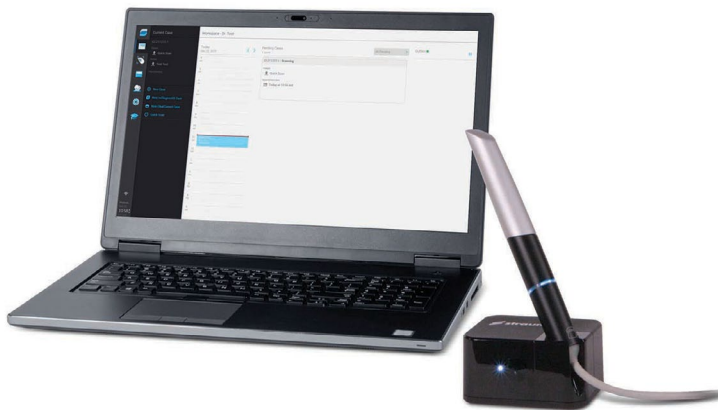

The Virtuo Vivo Intraoral Scanner from Straumann is a light and small handpiece (only 130 g), ergonomically designed to provide a pen-like grip and exceptional patient comfort. Teeth and soft tissue can be scanned from multiple orientations, capturing difficult-to-see areas with minimal effort. Resulting scans are in colour and high

resolution. The scanner boasts a removable, autoclavable sleeve in coated metal to ensure proper hygiene for the patient and practice.

Virtuo Vivo uses an open system, meaning that data can be exported and shared in a secure way with any dental lab partner.

To discover how the Virtuo Vivo Intraoral Scanner can work for you and your patients, visit the website today!

A whiter smile for the year ahead

Help your patients overcome the January blues with a boost to their smiles and their self-confidence. The Billion Dollar Smile Purple Whitening Toothpaste consists of only natural ingredients. It contains hydroxyapatite and 1450 ppm of fluoride to help repair the enamel and boost remineralisation, gentle and effective volcanic mineral polisher for effective stain removal, and purple pigments for an optical brightening effect.

Plus, it has been shown to lighten teeth by up to four shades with continuous use.

Peroxide-free, vegan-friendly, cruelty-free and enamel-friendly – discover the Billion Dollar Smile Purple Whitening Toothpaste for your patients today!

For more details, visit <https://billiondollarsmile.com/>, call 01480 862080 or email orders@billiondollarsmile.com.

Sinus augmentation made simple

Develop your understanding of internal sinus lifts and lateral window sinus grafts on the 'Sinus Augmentation: How and when?' course. Held in London on 17 January 2024, the course will be led by Dr Fazeela Khan-Osborne and Prof Dr Cristian Dinu on behalf of MegaGen.

Ideal for clinicians with some implantology experience, this course will provide expert insight into the practical skills necessary to augment bone in the maxillary sinuses.

Taking place at the Royal College of Physicians, London, the course is led by two highly respected figures in the field.

Dr Fazeela Khan-Osborne has extensive experience in the field, and is the founder and leader of One To One Implant Education, a renowned centre for dentists to study at all levels of

implantology. As the Principal Dentist at the One To One Dental Clinic and a renowned lecturer, she is an excellent fount of knowledge.

Prof Dr Cristian Dinu is also a renowned lecturer and clinician, having hosted talks at national and international congresses of Oral and Maxillofacial Surgery and Oral Implantology.

Clinicians can book their space on the course online, or contact the One To One team for more information.

To reserve your place or to find out more, visit <https://121implanteducation.co.uk> or call 020 7486 0000.
