How to further improve your patient care

3M are delighted to be a part of BDIA Dental Showcase at ExCeL London, on 22–23 March.

3M will be exhibiting some of their award-winning solutions to provide dental professionals with insights on how they can further improve their patient care.

These include stand out dental consumables, such as the renowned 3M RelyX Universal Resin Cement. An effective adhesive solution, it provides an immense bond strength to dentine, making it a reliable option in most cases without the need for an additional adhesive or primer.

3M can be found at stand G61 at BDIA Showcase, open for any and all questions about 3M's high-quality solutions, as well as the 3M Thank you Dental Alliance recognition programme.

To find out more about 3M at BDIA Showcase and book your place, contact the team today.

For more information, call 08705 360 036 or visit www.go.3M.com/ocsdpr.

3M and RelyX are trademarks of the 3M Company.

For streamlined in-house denture production

Dentsply Sirona, the world's largest manufacturer of professional dental products and technologies, enhances the range of applications for its Primeprint Solution with additions to its resin portfolio. The Lucitone Digital Print Denture System has now been FDA and CE cleared for Primeprint Solution. This enables practices and labs to grow and advance confidently to a streamlined in-house denture production process, supported by a fully validated 3D printing and post-processing workflow.

The Dentsply Sirona Lucitone Digital Print Denture System with Lucitone Digital Print 3D Denture Base, Lucitone Digital IPN 3D Premium Tooth and Lucitone Digital Value Trial Placement

for manufacturing of try-ins delivers the excellent combination of market-leading materials provided in the convenient Primeprint cartridge system for safe and clean usage. The resins offer the excellent combination of high impact denture resin and highly aesthetic, durable tooth resin. Furthermore, the highly automated and software-supported workflow requires fewer manual steps than traditional denture production techniques. The automatic washing and curing process with the Primeprint Post Processing Unit reduces the amount of manual labour needed to clean and cure – simplifying the workflow.

Primeprint Solution is a medical-grade 3D printing system that can be used to produce a wide range of medical applications. With simplified, end-to-end workflows the solution is designed to be convenient and easy to use while meeting very high standards of safety, cleanliness, quality, and accuracy.

Meanwhile, DS Core ordering portal provides dentists an easy-access solution to outsource the digital denture design to their skilled partner labs.
