

Carefully tailor your treatments

Adaptability to case situations allows clinicians to achieve excellent treatment outcomes, no matter the challenge in front of them. Prepare for any case with Advanced Biomaterials from Straumann, a comprehensive portfolio of hard and soft tissue regenerative solutions.

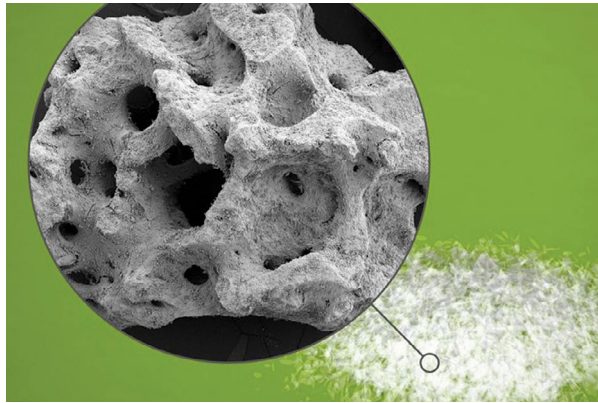

The diverse range is made up of biomaterials that are uniquely designed to provide better healing, volume preservation, natural aesthetics and quicker treatment.

There is no one-size-fits-all solution for each challenge a clinician faces. Within the Advanced Biomaterials range, dental professionals can access more than ten unique bone graft solutions and a variety of membranes that enhance treatment outcomes, tailoring the solution of choice to an individual case's needs.

Included within the portfolio are products like cerabone, which has been a part of over 1 million successful augmentations, and has renowned success in a number of medical applications. Patients can experience greater results in the long-term, with the opportunity to minimise implant complications such as bone resorption.

To learn more about Advanced Biomaterials and individualised care that exceeds expectations, contact the Straumann team today.

For more information on the complete range of biomaterials, visit www.straumann-uk.co/biomaterials.

A great choice for daily use

Interdental tools are able to effectively reduce plaque between the teeth, making them a great choice for patients' daily oral hygiene routines.

The FLEXI range of interdental brushes from TANDEX is ideal for your patients. Available in 11 different sizes, you can help patients find the perfect interdental brushes for them. FLEXI brushes are ideal for reducing plaque between the teeth, and should be used daily for the best results. Each size is easily identifiable by the ISO and PHD (passage hole diameter) numbers on their box, as well as their unique colours.

For patients who need an extra boost, recommend PREVENT GEL from TANDEX. It contains 0.12% chlorhexidine and 900 ppm fluoride to strengthen the enamel and provide an antibacterial effect.

For more information about oral hygiene solutions from TANDEX, get in touch with the team.

For more information on Tandex's range of products, visit <https://tandex.dk/>. Tandex products are also available from CTS Dental Supplies <https://www.cts-dental.com/> and DHB Oral Healthcare <https://dhb.co.uk/>.

The clear choice

Patients love clear aligners as an orthodontic solution that isn't just effective, but discreet for daily use, too. Meet and exceed patients' expectations by embarking upon the Clear Aligners (Level 1) course with the IAS Academy.

Be confident from diagnosis to assessment and treatment delivery, all the way to fitting and retention, with the brilliant programme that is ideal for clinicians looking to handle simple to moderate cases, the second they leave the building.

You will be led through the information and experiences you need to provide dentistry that lasts, and restore a smile to your patients' faces.

Plus, after the course, you can receive support through an online mentoring system. You could check the suitability of your cases and access help at any point throughout treatment, with three monitored cases included as part of your certification.

Lecturers at the IAS Academy are experienced and knowledgeable experts in their fields, who love nothing more than helping clinicians find their footing to succeed in orthodontic care.

To learn more about expanding your clear aligner skillset, contact the IAS Academy team today.

For more information on upcoming IAS Academy training courses, visit www.iasortho.com or call 01932 336470 (Press 1).
