

A digital workflow paired with top-class service

With the all-in-one treatment concept from the bredent group, you have the formula for success. Reduced complications, less time required, simple planning and first-class service which increases patient satisfaction.

The predictability of One-Time-Therapy in the digital workflow is unbeatable, allowing the treating team to plan several things in advance.

Immediate implantations, immediate restorations and even delayed restorations are easy to perform thanks to modern, coordinated workflows. The productivity of your team in the practice and lab will automatically increase and your patients won't just be satisfied, they'll be delighted. The bredent group is your professional partner with an enormous range of products, devices and services, from CAD/

CAM machines for the practice's lab, and intraoral scanners. bredent's product portfolio offers you the flexibility of an open system supported by top-class service from their experienced, highly qualified system advisors.

Contact bredent's system advisors with complete confidence when procuring intraoral scanners for your practice or DCS CAD/CAM milling machines and 3D printing materials for the practice's lab, so that they can ensure you find the right solution for your team and your business partners. The Made in Germany devices in bredent's portfolio offer you an unbeatable price-performance ratio coupled with top-class service, meaning that the partnership gives you a head start over everyone else.

New courses on indirect restorations for dental professionals

Dentsply Sirona's new Indirect Restorative course series covers a range of topics, including the latest advancements in digital technology, the science behind material selection, incorporating new technology into the practice, and digital workflows for indirect restorations. The new series consists of 11 courses taking participants from foundational to procedure-based to mastery-level. This self-paced online course series focuses on how digital dentistry can enhance indirect restorative treatment outcomes.

Each year, the DS Academy engages approximately half a million dental professionals through its clinical education available both in-person and online. The new Indirect Restorative course series further underscores the company's dedication to supporting dental professionals in their pursuit of knowledge and expertise. As the landscape of dentistry continues to evolve thanks to new innovations in digital technology, it is imperative to provide cutting-edge resources to empower dental practitioners to advance with confidence.

The new course series is the latest in a broader series of Clinical Education course series that dental professionals can access through the DS Academy online:

- Diagnosis and Treatment Planning course series
- Endodontics course series
- Implants course series
- Aligner course series
- Sustainability course series.

Dental professionals can access the new Indirect Restorative course series through the DS Academy online, where they can enrol and also access many other evidence-based educational materials and gain valuable continuing education (CE) credits [if available in your area].

An innovative alternative to CPAP

Are you looking for an innovative treatment for your patients with obstructive sleep apnoea (OSA)? Try O2Vent!

The OSA treatment from OADS is already a patient favourite in Australia and Canada, and is now available here in the UK. It provides OSA patients with a comfortable and discreet alternative to traditional treatment types, enabling patients to ditch the machine, mask, tubing, and power cord of CPAP.

The device is customised to fit each patient's unique anatomy so that, if there's a

blockage, air is drawn in through the device to the back of the throat, all while stabilising the lower jaw, bringing the tongue forward, and opening the airway.

This gives patients the freedom to sleep comfortably, without the uncomfortable side-effects commonly caused by CPAP treatment.

To find out more, visit the website or contact the team at OADS.

For more information, visit: <https://openairway.uk/> or call 0800 8611828 or email: infoUK@openairways.com.
