The Editor-in-Chief, on behalf of the Hypertension Research Editorial Board, greatly appreciate the generous support from peer reviewers. We made significant progress last year with an Impact Factor of 5.525, 801 submissions, and a total of 469 reviewers who kindly reviewed the manuscripts submitted from January to December 2022. In appreciation of their valuable contributions, we have

selected the Best Reviewers of the Year 2022. These individuals are simply elected based on the number of completed reviews. The number beside the reviewers' names indicates the number of completed reviews of original submissions.

We express our sincere gratitude to all reviewers for continuous support for Hypertension Research.
