Correction to: *Nature Communications* <https://doi.org/10.1038/s41467-019-08536-z>, published online: 05 February 2019

The original version of this Article contained an error in the title, which was previously incorrectly given as “Negative differential resistance as a critical indicator for the discharge capacity of lithium-oxygene batteries”. The correct version states “lithium-oxygen” in place of “lithium-oxygene”. This has been corrected in both the PDF and HTML versions of the Article.
