Author Correction: Dissymmetry enhancement in enantioselective synthesis of helical polydiacetylene by application of superchiral light

Chenlu He¹, Guang Yang², Yan Kuai³, Sizhen Shan¹, Lin Yang¹, Jingang Hu¹, Douguo Zhang³, Qijin Zhang¹ & Gang Zou¹

Correction to: *Nature Communications* <https://doi.org/10.1038/s41467-018-07533-y>, published online 30 November 2018.

The original version of the Article contained an error in Fig. 2 in which the TEM images in Fig. 2b and d were incorrect. The correct version of Fig. 2 is:

¹CAS Key Laboratory of Soft Matter Chemistry, Department of Polymer Science and Engineering, iChEM, University of Science and Technology of China, 230026 Hefei, Anhui, China. ²College of Science, Northeast Forestry University, 150040 Harbin, China. ³Department of Optics and Optical Engineering, Institute of Photonics, University of Science and Technology of China, Number 96 Jinzhai Road, 230026 Hefei, Anhui, China. These authors contributed equally: Chenlu He, Guang Yang, Yan Kuai. Correspondence and requests for materials should be addressed to D.Z. (email: dgzhang@ustc.edu.cn) or to G.Z. (email: gangzou@ustc.edu.cn)

which replaces the previous incorrect version:

Additionally, the seventh sentence of the ‘Mechanism for the dissymmetry enhancement of SCL field’ section of the Methods originally incorrectly read ‘Since the relative light intensity ratio $R = \frac{I_2 E_2^2}{I_1 E_1^2}$, the dissymmetry factor near the nodes of SCL field can be expressed as $g_{SCL} = g_{CPL} \times \frac{(1+\sqrt{R})}{(1-\sqrt{R})}$ ’. The correct version states ‘ $R = \frac{I_2}{I_1} = \frac{E_2^2}{E_1^2}$ ’, instead of ‘ $R = \frac{I_2 E_2^2}{I_1 E_1^2}$ ’. This has been corrected in both the PDF and HTML versions of the Article.
