Author Correction: A therapeutic combination of two small molecule toxin inhibitors provides broad preclinical efficacy against viper snakebite

Laura-Oana Albulescu, Chunfang Xie, Stuart Ainsworth, Jaffer Alsolaiss, Edouard Crittenden, Charlotte A. Dawson , Rowan Softley, Keirah E. Bartlett, Robert A. Harrison, Jeroen Kool & Nicholas R. Casewell

Correction to: *Nature Communications* <https://doi.org/10.1038/s41467-020-19981-6>, published online 15 December 2020.

The original version of this articles contained an error in Fig. 4. The graphs in panel B report the neutralization of SVSP venom by decreasing concentrations of the inhibitor nafamostat, from 150 μm to 150 nm, but the lowest concentration on the X-axis was incorrectly reported as 150 μm . This error has now been corrected on the PDF and HTML version of the article.
