In this article, the y-axis labels for Fig. 8b, d and Supplementary Figs. 30, 31, and 32b were wrongly labeled as “Potential (V vs Li/Li⁺)” but should have been “Cell voltage (V)”; the figures should have appeared as shown below. Besides, the caption for Fig. 4b–d was incorrectly given as “Electron localized function and E_{int} between the Li_xSi (Li₁₅Si₄, Li₁₂Si₇, and LiSi) alloys and major SEI components (LiF, Li₂O and Li₂CO₃), the color differences indicate the E_{int} value (from 0.0 to 1.0) with the scale bar shown on the left” but should have been “Electron localized function and E_{int} between the Li_xSi (Li₁₅Si₄, Li₁₂Si₇, and LiSi) alloys and major SEI components (LiF, Li₂O and Li₂CO₃) with the scale bar (from 0.0 to 1.0) shown on the left.”

The original article has been corrected.
