Publisher Correction: How fruit ripening is ENCODEd

Federico Scossa and Alisdair R. Fernie

Correction to: *Nature Plants* <https://doi.org/10.1038/s41477-018-0272-0>, published online 24 September 2018.

In the version of this News & Views originally published, the ripening mode of *Prunus persica* was incorrectly listed as ‘MADS-type loop’ in Fig. 1, the correct ripening mode is ‘NAC-type loop’. In addition, the authors would like to remove ‘H3K4me’ as a main epigenetic mark in ripening genes for *Musa acuminata*, *Solanum lycopersicum* and *Prunus persica* in Fig. 1, as this marker is common in all species. This figure and caption have now been amended in all versions of the News & Views.
