Correction to: *Nature Astronomy* <https://doi.org/10.1038/s41550-019-0845-5>, published online 29 July 2019.

In the version of this Letter originally published, a technical issue led to data points shifting in Fig. 1a; the correct version is shown below. In addition, in the second paragraph, M_{\odot} and R_{\odot} —the mass and radius of the Sun, respectively—were incorrectly defined as the mass and radius of the Earth. The Letter has now been corrected accordingly.

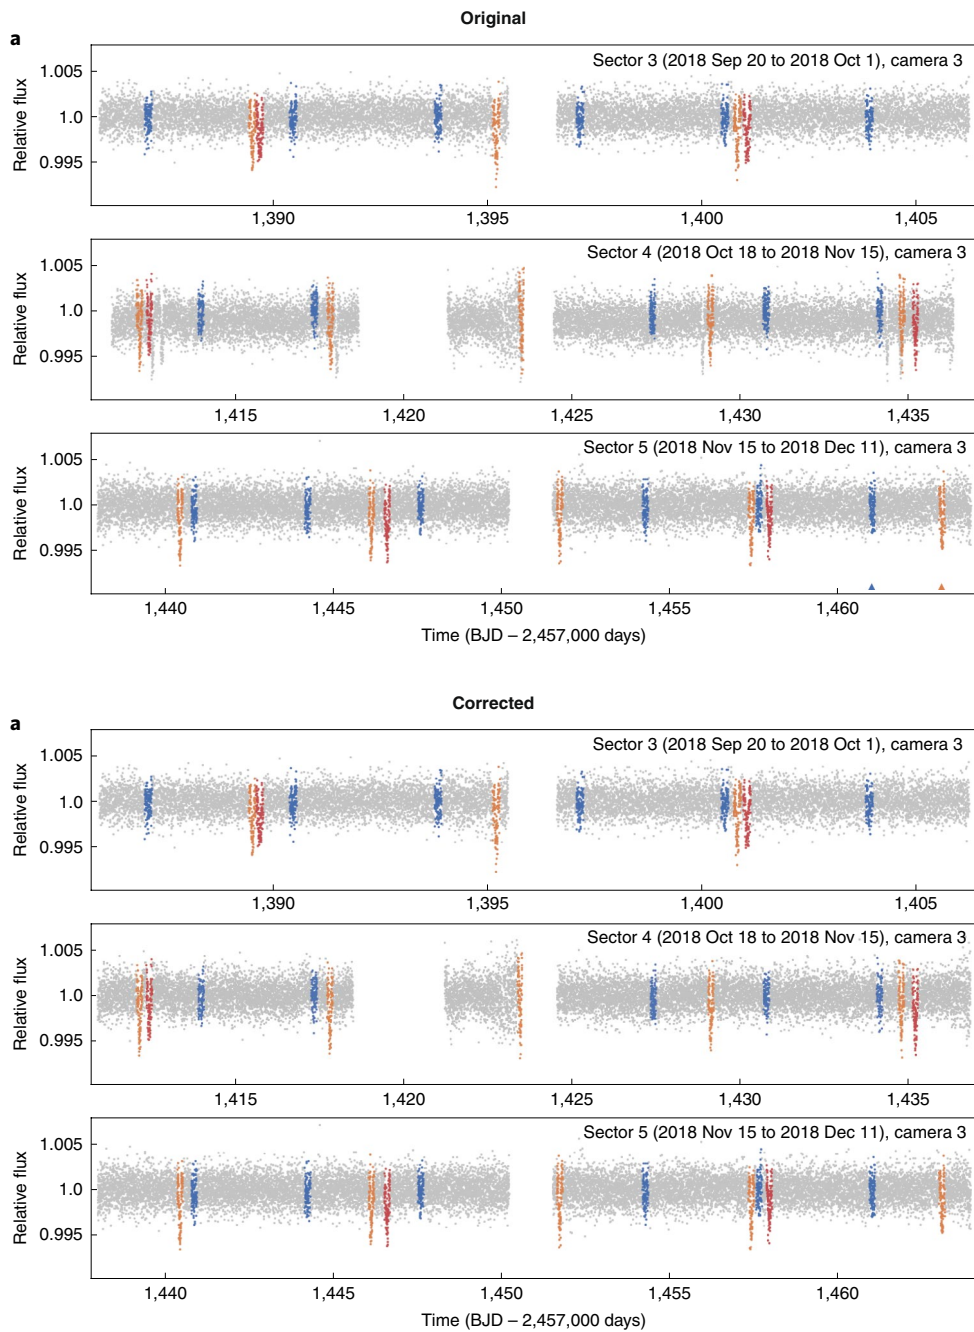

Fig. 1a | Original and corrected.
