Correction to: *Nature Cell Biology* <https://doi.org/10.1038/ncb3082>, published online 22 December 2014.

In the version of this Article originally published the same blot was inadvertently presented as both p-Rb and Cyclin A in Fig. 2a. This blot corresponds to the p-Rb panel, as can be seen in the unprocessed version of these blots in Supplementary Fig. 9. The corrected version of the panel is shown below, together with a completely uncropped image of both blots. In addition, in the 'Viral transduction' section of the Methods, the pLKO.1 plasmids encoding short hairpin RNAs targeting human Rnd1 were incorrectly listed as clones TRCN0000018338 and TRCN0000039977. The correct clone numbers are TRCN0000047434 and TRCN0000047435.

Fig. 2 | Original and Corrected.

Uncropped blot.
