

Author Correction: Path-dependent reductions in CO₂ emission budgets caused by permafrost carbon release

T. Gasser , M. Kechiar, P. Ciais , E. J. Burke , T. Kleinen , D. Zhu , Y. Huang, A. Ekici and M. Obersteiner

Correction to: *Nature Geoscience* <https://doi.org/10.1038/s41561-018-0227-0>, published 17 September 2018.

In the version of this Article originally published, data given for total exceedance budgets of CO₂ for 1.5 °C and 2 °C targets were incorrect in the main text, although the correct values were given in Supplementary Table 1. These errors also resulted in an incorrect estimation of the percentage difference between the authors' results and estimates by the IPCC. These errors have now been corrected in the online versions. The original and corrected statements are shown below.

Original

When permafrost carbon is ignored, we estimated total exceedance budgets of 2,320 (2,260–2,450) Gt CO₂ for the 1.5 °C target and 3,230 (3,080–3,530) Gt CO₂ for 2 °C, with 1870 as the preindustrial reference year (Supplementary Table 1, which also contains budgets for 2.5 °C and 3 °C). (Uncertainties are the minimum-to-maximum range across the permafrost models and scenarios.) Our results are ~2% different from the IPCC estimates based on complex models.

Corrected

When permafrost carbon is ignored, we estimated total exceedance budgets of 2,350 (2,290–2,480) Gt CO₂ for the 1.5 °C target and 3,260 (3,110–3,550) Gt CO₂ for 2 °C, with 1870 as the preindustrial reference year (Supplementary Table 1, which also contains budgets for 2.5 °C and 3 °C). (Uncertainties are the minimum-to-maximum range across the permafrost models and scenarios.) Our results are ~3% different from the IPCC estimates based on complex models.

Publisher Correction: Fluid-driven metamorphism of the continental crust governed by nanoscale fluid flow

Oliver Plümpner, Alexandru Botan, Catharina Los, Yang Liu, Anders Malthe-Sørensen and Bjørn Jamtveit

Correction to: *Nature Geoscience* <https://doi.org/10.1038/ngeo3009>, published online 14 August 2017.

In this Article, owing to a technical error, the Greek letter μ is missing from the scale bar measurements given in the caption for Fig. 2b–e; they appear as '50 m (b); 20 m (c); 1 m (d); 1 m (e)', but should be '50 μ m (b); 20 μ m (c); 1 μ m (d); 1 μ m (e)'. We apologize for this error and any confusion caused.
