In the version of this article initially published, a citation was missing in the Box 5 sentence now reading “The Zucman-Rossi laboratory found tumours that had previously been characterized as mixed FLC/hepatocellular carcinoma that had an inactivation of BRCA1-associated protein 1 (BAP1), which, amongst other things, increased activation of PKA⁶³”. The new ref. 63 (Hirsch, T. Z. et al. *BAP1* mutations define a homogeneous subgroup of hepatocellular carcinoma with fibrolamellar-like features and activated PKA. *J. Hepatol.* **72**, 924–936 (2020)) has now been inserted in the HTML and PDF versions of the article.
