In the subsection on post-licensure considerations, the authors wish to clarify that accelerated licensure granted for high-dose trivalent influenza vaccine was independent of the 2009 H1N1 outbreak, and the randomized controlled trial in approximately 31,000 adults 65 years of age and older showed that the high-dose influenza vaccine demonstrated clear superior efficacy relative to the standard-dose vaccine²¹⁰. Text in this subsection has been modified accordingly.
