
Publisher Correction: Recognizing the involvement of early-career researchers in peer review

Nature Reviews Endocrinology (2020) <https://doi.org/10.1038/s41574-020-0404-2> Published online 14 August 2020

The original version of this article included an error, stating that “Since the scheme launched, 41% of researchers who agreed to act as a referee for *Nature Review Endocrinology* opted to include an ECR as a co-reviewer”. The text should have read “Since the scheme launched, 41% of manuscripts sent out for review have had at least one ECR involved”. This has now been corrected online.
