Publisher Correction: Attachment of the blastoderm to the vitelline envelope affects gastrulation of insects

Stefan Münster, Akanksha Jain, Alexander Mietke, Anastasios Pavlopoulos, Stephan W. Grill & Pavel Tomancak

Correction to: *Nature* <https://doi.org/10.1038/s41586-019-1044-3>, published online 27 March 2019.

In this Letter, owing to an error during the production process, the sentence: ‘For instance, *Tribolium* and *Drosophila* inflated are direct targets of the mesoderm that specify the transcription factor twist and suggest common upstream regulation.’ should have been: ‘For instance, *Tribolium* and *Drosophila* inflated are direct targets of the mesoderm-specifying transcription factor twist, which suggests common upstream regulation.’. This has been corrected online.
