In this Article, a paragraph was omitted from the ‘Data availability’ statement. The revised statement should read as follows: “Nucleotide sequence data of *Cannabis* candidate prenyltransferases are available in the third-party annotation section of the DDBJ/ENA/GenBank databases (Extended Data Table 4). Strains and plasmids developed for this study (Extended Data Table 1), along with annotated sequences, have been deposited in the Synthetic Biology Engineering Research Center (Synberc) Registry (<https://synberc-registry.jbei.org/>) and are physically available from the authors upon reasonable request. Custom Python 3.6 scripts for data analysis are available from the authors upon reasonable request. **Contractual obligations from commercial partnerships prohibit us from distributing (by ourselves or through a third party) strains described in our manuscript to for-profit commercial entities. However, we provide extensive genotypic descriptions of our strains, fully annotated DNA sequences, and detailed methods that enable others to build upon our work. Strains will be provided to nonprofit, government, or academic laboratories and institutions.** Strains producing controlled substances or their direct precursors can only be provided to laboratories and institutions with appropriate approvals and licenses (for example, DEA permits).” The original Article has been corrected online.
