In this Article, there were three issues with the references. First, citations to Ahmed et al. (2020)¹ and Zipper et al. (2020)², published while our manuscript was in revision, were missing, and have now been added as refs. 95 and 96 after the modified sentence: “Levels of the steroid hormone ecdysone, which promotes egg production **and intestinal stem-cell** proliferation, increase after mating”. Second, a citation to Kohl and Dulac (2018)³ was inadvertently deleted during the re-formatting of the Article and has now been added as ref. 94 after the sentence: “Internal state has profound effects on brain function”. Third, a typo in ref. 38 of the original Article (Davey and Treherne, 1964) has also been rectified. Finally, ‘reduce’ should have been ‘increase’ in the text: “Expression of a dominant-negative EcR—which targets all EcR isoforms—confined to the Ms neurons of adult flies was found to **increase** intracellular Ms levels...”. The original Article has been corrected online.
