In the version of the article initially published, in the legend to Fig. 6, the text now reading “Numbers of SNPs that were nominally significant ($P < 1 \times 10^{-6}$) in the IPF GWAS meta-analysis and also eQTL” originally read “Heatmaps presenting the numbers of eQTLs that were nominally significant ($P < 1 \times 10^{-6}$) in the IPF GWAS meta-analysis” and has now been corrected in the HTML and PDF versions of the article.
