In the version of this article initially published, the statement now reading “The *All of Us* Research Program Resource Access Board (RAB) has granted a post-hoc exception to the program’s [Data and Statistics Dissemination Policy](#) for reporting exact participant counts of less than 20 in some of the analyses reporting in this study, due to the very low risk to participant privacy and potential for re-identification” was mistakenly omitted from the “Study participants” subsection within the Methods. The error has been corrected in the HTML and PDF versions of the article.

In the version of this article originally published, there was a typographical error in the third row, fifth column, of the table in Figure 1, where the population number remaining at 30 months, now reading “7,” appeared originally as “17,” while the Data Availability section has now been updated to note that “The RNAseq dataset is available on dbGAP (<https://dbgap.ncbi.nlm.nih.gov/>) to researchers with an approved dbGAP profile as outlined on the website, using the accession number phs003199.v1.p1.” The changes are reflected in the HTML and PDF versions of the article.
