In the version of this article initially published, refs. 12 and 16 were duplicated as refs. 21 and 22, which have now been removed and the list renumbered. There were typographical errors in the Supplementary Information which are reflected in descriptions of the meta-analysis in the main text, as follows: the review included 47,035,065 patients with cancer (not 46,952,813, as stated previously), the number of whom died by suicide is 69,401 (not 69,298 as reported previously), encompassing 107,961,345 person-years of follow-up (not 107,691,796, as noted previously); the “Study population” section of the Results now reports 30 studies performed in the USA and 25 in Europe (not 31 and 24, respectively, as stated previously). The abstract and the “Study population,” “Sensitivity analyses using all 62 eligible studies” and “Assessment of publication bias” sections of the Results have been amended.

The typographical errors in the Supplementary Information were corrected as follows: pages 6 and 12, Turaga et al., end-time of recruitment updated from 2015 to 2005; page 7, Pata-sius et al., standardized mortality ratio updated from 1.01 to 1.10; page 7, Levi et al., follow-up in person-years updated from 57,614 to 57,164; page 8, Alanee et al., number of suicide cases updated from 30 to 33; page 9, Osazuwa-Peters et al., study population count updated from 205,658 to 287,901; pages 7 and 11, Kaceniene et al., country of study updated from USA to Lithuania.

The results of the metadata analysis remain unchanged. Updates have now been made in the HTML and PDF versions of the full text, Extended Data Figures 2, 4 and 5 and the Supplementary Information.
